

Release Notes for Public PTF (2010-12-07)

1. Origin Product/Version

OX v6.18.1 Rev 9

2. Packages shipped with this PTF Release

OX v6.18.1 Rev 12 (built 2010-12-02/06)

3. Bugs fixed with this PTF Release

- 17292 DB connection count rises and causes service outage
The "hlimit" is now set to "true" by default.
No possible side effects.
- 17658 OX does not work at all with a quite limited thread pool
No poll (take with timeout) on a submitted task to thread pool. Thus a thread pool configured with a small size still works without timed-out tasks.
No possible side effects.
- 17647 IP check needs to kill session
Disabling session on failed IP check
No possible side effects.
- 17691 Mail folder not shown/working in non-expert mode
Fixed a problem in IE7 that no folders are shown when switching to mail and expert tree is disabled and quota is enabled.
No possible side effects.
- 17539 Very high load in groupware nodes
Little improvement to improve loading global address book with huge number of users
No possible side effects.
- 17703 direct links in POA /APS not working due to incorrect URL parsing
Fixed a problem that setting a hash parameter to redirect to the resources and groups option pages didn't work anymore.
No possible side effects.

New Plugin: A new plugin has been added where the administrator can change the default folder tree view (enhanced or flat tree view) unless a user already changed this setting. To activate and configure the plugin a property file must be added on the backend.

The following options can be set in this property:
modules/com.openexchange.settings.folder/show=true (enable the check)
modules/com.openexchange.settings.folder/condition=[1-3] (condition, 1=all user, 2=all user with infostore, 3=as 2 but user must have at least n files stored in the infostore)
modules/com.openexchange.settings.folder/minFiles=1 (if condition set to 3 this is the minimum number of files a user must have)

4. Changes relevant for Administrator

Changes of configuration files

- none -

Changes of database schemes

- none -

Changes of command line tools schemes

- none -

5. Changes relevant for Developers

Changes of the HTTP API

- none -

Changes of the RMI API

- none -

Changes of the WebDAV API

- none -

6. Tests

To avoid side effects the packages have gone through automated "Smoke" and "Always" test on both, the OX Build System and a distributed OX QA server

setup.

The OX QA team has verified all bug fixes.

7. Side effects

No side effects.
