

Release Notes for Public PTF (2011-03-03)

1. Origin Product/Version

- OX v6.18.2 Rev 22

2. Packages shipped with this PTF Release

- OX v6.18.2 Rev 25 (built 2011-03-02)
- OXtender 1 for Microsoft Outlook 6.18.11
- OXtender 2 for Microsoft Outlook v7.0.9

3. Bugs fixed with this PTF Release

- 18280 Unified Mail folder can not be opened for external email services
Using wrapping MailMessage instance.
No possible side effects.
- 18284 Subscribing email folders in IE 7/8 not possible
Fixed the setting of a with value which was null in IE.
No possible side effects.
- 18292 Moving InfoStore folder through WebDAV interface is not possible
anymore
Move of folders is no longer forbidden.
No possible side effects.
- 18357 Can't delete created folders
Same cause as bug #18292.
No possible side effects.
- 18393 USM error: unparseable reply or missing field (0x800d1000)
In some cases, the response for deleted groups from the USM where
incorrectly interpreted as error.
No possible side effects.
- 18420 Fast delete of many e-mails in Outlook causes error
There existed a small bug in the detection algorithm for duplicate email
creations which triggered an internal security check in the USM base
system.
No possible side effects.
- 18423 "Content-Type: multipart/form-data" within mail created by OX cannot
be parsed
The Content-Type forwarded by browser for the uploaded file was used
without inspection.
No possible side effects.
- 18429 Default Mail folders are mixed up.
Using proper default folder indexes.
No possible side effects.

- 18430 exception_message "Contains non-LDH characters.:"
To allow updates on already existing mails containing illegal mail addresses, the USM MimeMailBuilder now uses a fallback algorithm (simple composition in the form <personal> + " <" + <address> + ">" or only <address> if no personal part available) if the normal algorithm fails. Note that sending of such an email will still fail because the OX server performs an additional check when sending the mail.
- 18434 USM:error by output of mime mail: No content
The MimeMailBuilder used by the USM to generate MIME message from the JSONObject sent by the client was too strict, some valid mails were rejected. The MimeMailBuilder has been restructured.
No possible side effects.
- 18468 Ressources are not shown or listed incompletely
Fixed a bug in the MAPI-Provider.
No possible side effects.
- 18476 Wrong IMAP folder mapping for newly created users
Same cause as bug #18429.
No possible side effects.
- 18485 Too much recursion error when clicking on a pop3 draft message in unified inbox
Fixed an recursion error when you try to read a message within the unified drafts folder.
No possible side effects.
