

## Release Notes for Public PTF (2011-03-25)

### 1. Origin Product/Version

OX v6.18.2 Rev 27

### 2. Packages shipped with this PTF Release

OX v6.18.2 Rev 29 (built 2011-03-25)

### 3. Bugs fixed with this PTF Release

- 18681 Multiple Invalid SQL Query in logs of EAS host  
Removed caching of user contacts and corrected SQL query to load them when context has more than 1000 users.  
No potential side effects.
- 18615 mail push does not work when login does not match mailbox name  
The fix now checks the mailboxname as sent from the imap server against all configured aliases of the user.  
No possible side effects.
- 18588 Report client requests wrong values for OLOX2 reporting  
Changed request value from regex to wildcard.  
No possible side effects.
- 18329 Multipart mail could not be parsed - "Array index out of range"  
Fixed ArrayIndexOutOfBoundsException in jTidy library.  
No possible side effects.
- 17590 Custom crawler throws error while trying to subscribe to source system  
Fixed a customer plugin.  
No possible side effects.
- 18219 Unable to access publications created by PIM users  
The publish service now uses the user interface instead of the global address book.  
No possible side effects.
- 18494 Importing iCal attachment from google appointment invitation mail fails  
Adjusted the error code in the USM.  
No possible side effects.
- 18422 Deleting trash in the GUI causes Outlook error  
Adjusted the error code in the USM.  
No possible side effects.
