Release Notes for Public PTF (2011-04-15)

1. Origin Product/Version

OX v6.18.0 Rev 20 (Public PTF)

2. Packages shipped with this PTF Release

OX v6.18.0 Rev 26 (built 2011-04-12/14)

3. Bugs fixed with this PTF Release

17915   Infostore broken at
"com.openexchange.consistency.Consistency$CreateInfoitem"
Adjusted the file storage implementation to supply the correct list of
files.
No possible side effects.

18212   Cannot find mail account with identifier 1 for user 6 in context 529125.
exceptionID=-1636201372-31114
Retry with read-write connection if read-only connection fails to read
newly created mail account.
No possible side effects.

18296   Using unified mailboxes for POP3-Accounts creates duplicate folders
Introduced new mail property
"com.openexchange.mail.hidePOP3StorageFolders" to hide POP3 storage
folders. Default is "false".
No possible side effects.

18280   Unified Mail folder can not be opened for external email services
Using wrapping MailMessage instance to support string-based message
identifiers in Unifed Mail bundle.
No possible side effects.

17891   Searching in the trash folder results in "String index out of range: 0"
Fixed possible IndexOutOfBounsdException when checking quotes in
personal part of an email address.
No possible side effects.

18788   user db schema got dropped when MySQL returns old identifier for new
schema
MySQL seems to have a problem under certain circumstances to
generate proper unique identifier. Unfortunately this can cause a drop of
a long existing database schema filled with a lot of contexts. The fix
takes care of this and does not drop the schema anymore. Additionally
another method is used to create proper unique identifier.
No possible side effects.

18141 Send E-Mail about this publication does not work for pim users only (no mail window opens)
Fixed a problem that "Send E-Mail about this publication" doesn't work for PIM users. It fails because of the missing module infostore. In this case the template selection is not available and the check fails with a JavaScript error.
No possible side effects.

18219 Unable to access publications created by PIM users
Using the User-API instead of searching in the global addressbook.
No possible side effects.

18911 Links in plain text mails not correct
Fixed URL/Link detection.
No potential side effects.

18912 Improve error message if mysql reports an error.
Removed failed SQL command from the user visible exception messages.
No potential side effects.

4. Changes relevant for Administrator

Changes of configuration files

mail.properties

```
# Whether folders which carry a POP3 account shall not be displayed.
# This property affects primary account only.
com.openexchange.mail.hidePOP3StorageFolders=false
```

Changes of database schemes

- none -

Changes of command line tools schemes

- none -

5. Changes relevant for Developers

Changes of the HTTP API

- none -

Changes of the RMI API

- none -

Changes of the WebDAV API

- none -

6. Tests

To avoid side effects the packages have gone through automated "Smoke" and "Always" test on both, the OX Build System and a distributed OX QA server setup.
The OX QA team has verified all bug fixes.

7. Side effects

No side effects.
