1. About this Release

This release covers user interface and backend improvements.

The improvements are:

- Notification regarding attachments not visible when creating new mail
- Configuration option for disable upsell switches

In addition we have included new and improved versions of the different OXtender's.

The Open-Xchange preview server <https://www.ox.io/> gives you access to the latest developer version where you can check out all the new features included in the next software release. This means it is not necessary to install the Open-Xchange Server.

2. OX 6 – User Interface Features, Plug-In's, etc.

2.1. Notification regarding attachments not visible when creating new mail

With v6.20.4 Open-Xchange provides user information in the mail attachment upload dialog. The User is informed, that it isn't possible to have a preview of the chosen attachment in the upload dialog. For the creation of a draft email in particular, it is necessary to save the draft mail first, in order to have a preview of the attachment. The message is displayed between the search field and the list view of the upload dialog.

3. OX6 - Administration, Technical Extensions, Plug-In's, etc.

3.1. Configuration option for disable upsell switches

Open-Xchange provides a new configuration option to disable the upsell switches. Additional, tabulators like "Attachment", etc., will be disabled with the

new configuration option. And the following message will be displayed "Only those functions are visible, the user has access to
