

Release Notes for Public PTF #752 (2011-06-24)

1. Origin Product/Version

OX6 v6.20.0 Rev 12 (Public PTF)

2. Packages shipped with this PTF Release

- OX6 v6.20.0 Rev 15 (built between 2011-06-21 and 2011-06-24)
- OXUpdater 6.18.8
- OXtender for Microsoft Outlook 6.18.14
- OXtender for Microsoft Outlook 7.0.19

3. Bugs Fixed with this PTF Release

- 12612 "Reminder" information missing in task H-Split view
Added field reminder to the H-Split detail view.
No possible side effects.
- 12759 Mailer shouldn't change mail formatting
Fixed mail formatting in the GUI.
No possible side effects.
- 12843 Task reminder dialog shows appointment icon
Fixed timing issue on choosing the correct icon.
No possible side effects.
- 13429 Distributionlist hovers show fields for attachments but it's not possible to add those
Hide the tab when it is a distribution list.
No possible side effects.
- 14095 IE8: First popup window of a session always pops up in the background
The window handler has been completely changed in the meantime, so this has been fixed in the meantime.
No possible side effects.
- 14112 IE8: Folder 'move' popup is quite large
Has been fixed in the meantime.
No possible side effects.
- 14541 Change to "shown as" field of a appointment are not shown in Safari 4
Has been fixed in the meantime.
No possible side effects.
- 14607 inline pictures not seen any more after working for a while
This happened because inline images timed out after a while for security reasons. This has been already fixed on the back-end.
No possible side effects.

- 14715 E-Mail hover increments foldertree unread counter by 1 and other funny stuff
Folder tree has been completely re-designed in the past.
No possible side effects.
- 14738 quoting on answer is broken
Applying style tags from the original mail on answering e-mails.
No possible side effects.
- 14804 autocomplete gives wrong results
Has been fixed in the meantime. Search result looks fine now.
No possible side effects.
- 14878 Task confirmation window shows some NaN if no task start/end date is set
Already fixed in the meantime.
No possible side effects.
- 14900 Wizard buttons only works when clicking them in the middle
The click event handler has been attached to the input field and not to the topmost div around it.
No possible side effects.
- 14924 Creation date is set to NaN... after changing a task in hsplit view
Already fixed in the meantime.
No possible side effects.
- 15122 email window content is changed
Already fixed in the meantime.
No possible side effects.
- 15183 Unable to deselect title when inplace editing
Already fixed in the meantime.
No possible side effects.
- 15220 subscribe folder always selects the default account
Use the correct account on subscribing folders.
No possible side effects.
- 15341 No print button in windows opened from mail attachments
Most modern browser uses tabs instead of windows now and disallow hiding the menu bar. In fact this problem should be already solved. However, under circumstances it can happen that you still see the old pop-up style window (e.g. using IE7). In that case we allow the tool-bar mode which solves that problem in pop-ups as well.
No possible side effects.
- 15430 User Birthdays of Contact edit/User settings not in sync
Already fixed in the meantime.
No possible side effects.
- 15581 Hover on address book does not show Address labels (Chrome css bug)
Already fixed. Tested with Chrome 12.
No possible side effects.
- 16617 Recipient notification not shown in some cases
Has been fixed in the meantime.
No possible side effects.

- 16775 Problem replying an Email
Has been fixed in the meantime.
No possible side effects.
- 16793 no copy context item for contacts
Added copy and move items to context menu.
No possible side effects.
- 17406 com.openexchange.secret.recovery GUI plugin does not support internationalization
Fixed in the meantime. Strings has been added to the translation process.
No possible side effects.
- 17575 Tray icon blinks permanently
Fixed problem for mixed languages (e.g. German Windows and English Outlook).
No possible side effects.
- 17749 Englisch error description in German GUI
Timing issue. The browsers language has been used. Wait for loading completed before triggering the error now.
No possible side effects.
- 17880 When switching contact folders the letter in the alphabet filter remains selected but the list is not filtered by letter
When switching folder we reset the selection now.
No possible side effects.
- 17955 Double click on empty space in livegrid doesn't open new window
Fixed wrong event handling.
No possible side effects.
- 18031 new contact folder is not displayed immediately
Folder creation process has been redesigned. Already fixed.
No possible side effects.
- 18116 Subscribe to yahoo's contact information, there is only email, the others are missed.
Fixed with new Oauth-API-implementation. This crawler is no longer language-dependent! See change #748.
No possible side effects.
- 18331 No search options for search in infostore but very small bubble
Already fixed in the meantime.
No possible side effects.
- 18382 Report Client doesn't work with proxy which requires authentication
Configuration issue at the customer.
No possible side effects.
- 18460 Cannot select appointments when calendar is landing page
Fixed selection if start module is calendar.
No possible side effects.
- 18497 switching view in tasks loses selection
Remember the selected task on view change
No possible side effects.

- 18519 Into Hover preview of mail containing HTML text is reported presence of an attachment even when there isn't.
It's a multipart alternative message. That means the HTML part is also attached as plain text part. In the hover we force to display the plain text part only so the alternative html part will be counted as attachment. Usually this isn't a bug - but in this case I could fix it by requesting the html part as well, even if I don't use it.
No possible side effects.
- 18520 When you receive an invitation IMIP by an external user, if User OX is in "list view" has no way of accept the invitation
Added buttons to e-mail detail view.
No possible side effects.
- 18555 Folder view `_not_` consistent between expert view and normal on new folder creation
Already fixed in the meantime by rewriting the folder creation process.
No possible side effects.
- 18590 OXtender could not load plug-ins, because proxy is used
Fixed connections over proxy.
No possible side effects.
- 18605 Printing does not always work
Disabled the print button where printing isn't possible.
No possible side effects.
- 18630 UDP push throws "Invalid argument"
Improved logging of UDP send errors.
No possible side effects.
- 18646 `push.udp.senderAddress` used as sender adress for internal push packages
Better equality check for network interfaces in use in UDP push.
No possible side effects.
- 18798 Teamview opened the first time time range is not correctly displayed
Correctly calculate the zoom.
No possible side effects.
- 18805 Button "Hinzufügen" when attaching local files to Email is without function
Clean-up of that dialog and removed the string 'Attachment' completely.
No possible side effects.
- 18827 After error appeared the error history doesn't work anymore
Already fixed in the meantime.
No possible side effects.
- 18875 All available templates are displayed as selection for Publications
Stricter filtering of server side templates.
No possible side effects.
- 18891 Unable to reset search in contacts
Reset the storage cache after resetting the search.
No possible side effects.

- 18893 Doubleclick in cards view opens multiple pop-ups
Fixed timing issue on adding the events.
No possible side effects.
- 18897 OX sends an exception error when the user deletes an infostore folder
Already fixed.
No possible side effects.
- 18899 Infostore title gets overwritten when saving mail attachments to the infostore
Don't lose title when saving a mail attachment in the infostore.
No possible side effects.
- 18923 Inconclusive error message when a large file is attached
Errors that contain an error status 11 are now always displayed to the user.
No possible side effects.
- 18945 OLOX2 produces huge logfiles because Loglevel is set to Verbose
Lowered default log level.
No possible side effects.
- 18952 Disabled 'Apply' button after error message
Fixed setting of the flags.
No possible side effects.
- 18954 Edit drafts button, does not show in external imap accounts (Using menu tab view)
Already fixed.
No possible side effects.
- 18959 Double click on a mail in an external draft folder doesn't open the mail in edit mode
A double-click on a draft mail opens the drafts edit window now.
No possible side effects.
- 19067 Can not continuous change the flag for info items
The GUI cache was not correctly updated.
No possible side effects.
- 19073 Can't add flag after canceled the operation once
The GUI cache was not correctly updated.
No possible side effects.
- 19074 Operating in Infostore to delete permissions for users, sidepanel disappeared
The GUI cache was not correctly updated.
No possible side effects.
- 19075 Wizard cannot be launched after previous (SIEVE) error window.
Follow-up of an configuration change. Already fixed.
No possible side effects.
- 19084 UI requests the all request 2 times when selecting a folder that is not already cached in the UI
Honor tab character when parsing ENVELOPE's subject.
No possible side effects.

- 19106 incomplete info in appointment email
Fixed translation issue for zh_CN and zh_TW.
No possible side effects.
- 19113 Creating new folders in the settings area should not be possible
Fixed an additional case where the options was enabled.
No possible side effects.
- 19121 Granting permission for mail folder possible even if not active on IMAP-Server
The mail folder capabilities are synchronized for new folders.
No possible side effects.
- 19127 No error message displayed when trying to upload a too large contact image
Sending correct error message from the server.
No possible side effects.
- 19133 "Only one admin permission is allowed on a private folder" error after trying to delete contact in Outlook
Implemented an additional check if a groupware folder is created below a mail folder.
No possible side effects.
- 19137 Clicking on post in the RMB menu of a facebook message shows no action
Fixed missing "To" parameter on second attempt.
No possible side effects.
- 19139 Facebook messages not shown directly
Fixed a GUI caching bug.
No possible side effects.
- 19155 Standard folder are not correctly detected on Freemail mail accounts
Introduced create-if-absent mechanism for external accounts' default folder full names.
No possible side effects.
- 19173 Appointments for external participants one hour later
Adding timezone definition to iCal file.
No possible side effects.
- 19208 Configuration settings always show "hide" for portal contact widget
Fixed wrong value in user configuration.
No possible side effects.
- 19220 It should be possible to disable SocialOX messaging through the new config cascade
Show goodwill when user and context is not known.
No possible side effects.
- 19224 Save button should be grayed out on published folders
Disable the save button at folders when you have no rights to save.
No possible side effects.

- 19226 Outlook OXtender is missing as upsell icon in the panel
OutlookUpdater bundle now provides two settings to indicate if module is available and if the user has all necessary permissions to see it.
No possible side effects.
- 19228 Non-working operations in RMB menu for unified mailbox folders should be disabled
Removed appropriate permissions from Unified Mail folder(s).
No possible side effects.
- 19263 Contacts from Global Addressbook can be booked as resource
Turned off "Add resource" for internal users in participants dialog.
No possible side effects.
- 19266 Mandatory fields in Wizard and Personal Data are not marked
Mark mandatory fields by bold font and a red asterisk.
No possible side effects.
- 19270 Address book not sorted alphabetically in card view
Considering given names if surnames are equal.
No possible side effects.
- 19291 Login hangs at 90% when invalid IP was entered for external mail account
Throwing proper error if an invalid host name is entered.
No possible side effects.
- 19304 wizard does switch the theme only on browser reload
"Theme will be applied after a new login." message is shown now after changing it.
No possible side effects.
- 19305 Changes in Unified Mail do not take affect immediately for Send Object and Drafts
Disabled caching for Unified Mail folders
No possible side effects.
- 19306 "Send as attachment" of an InfoStore itme is greyed out for first use
Fixed right check.
No possible side effects.
- 19308 "Show in calendar" button is too small when FR language is selected
Expand the button.
No possible side effects.
- 19313 Category is missing when printing tasks
Added categories to print view.
No possible side effects.
- 19321 Deleted tasks are still present and produce error
Fixed caching problems.
No possible side effects.
- 19335 Appointment mail from windows phone 7 through eas are not displayed in OX
Fixed NPE when converting TNEF to Ical.
No possible side effects.

- 19336 personal calender entry in team-view one day too much
Additionally fixed the rendering part.
No possible side effects.
- 19340 Error message appears instead of a prompt (after changing the password in the OX)
Check for a changed password.
No possible side effects.
- 19344 Unhelpful error message when saving wrong size value in mail filter
Show a more meaningful error message and mark the corresponding field.
No possible side effects.
- 19347 Contact Widget not updating
Portal can now be configured to refresh whenever the user enters it (default is false).
No possible side effects.
- 19358 CSV Import
Ignoring invalid date strings and generate an appropriate warning.
No possible side effects.
- 19363 Attachment settings not available for tasks
Correctly update the selection.
No possible side effects.
- 19373 The updater should not display the OXtender 1 when outlook 2010 is installed
Not presenting OXtender for Outlook 1 if Outlook 2010 is installed.
No possible side effects.
- 19374 Error if you create a 2nd subfolder named equivalent to the folder above in a Shared Folder
Hierarchical-wise display of shared folders.
No possible side effects.
- 19377 Reading a folder returns data for already deleted folder
Introduced listener for folder events in IMAP bundle to clear LIST/LSUB cache if necessary.
No possible side effects.
- 19384 When editing the pattern of a recurring appointment, the header says "Neue Serie anlegen"
It's just 'Series' now.
No possible side effects.
- 19391 Publications are still available after downgrade of user
Check publication permission before delivering publication.
No possible side effects.
- 19392 JS error iNode is undefined when subscribe/unsubscribe a mail folder
Fixed a case where iNode can be undefined.
No possible side effects.

- 19396 side-panel up-sell passes a string instead of window object to showUpsellLayer
Fixed up-sell call.
No possible side effects.
- 19397 Switching from Facebook to Twitter in GUI doesn't change content
Fixed several timing issues in the messaging
No possible side effects.
- 19398 offer to save changes made to infostore folder rights although no permission to do so
Don't show the save reminder if you have no rights.
No possible side effects.
- 19400 java.lang.IllegalArgumentException at MALPollPushListener
Fixed possible IllegalArgumentException.
No possible side effects.
- 19402 strange naming "premium upgrade holen" for premium upsell button
Changed wording.
No possible side effects.
- 19407 UI suppresses error messages while changing IMAP folder subscriptions
Checking for forbidden subscribe operation on a default folder and do not suppress error messages in the GUI.
No possible side effects.
- 19409 it is possible to create an unnamed calendar folder which cannot be removed again
Setting no title is interpreted as abort like hitting escape.
No possible side effects.
- 19410 stack trace printed instead of publication
No stack trace in publications on error.
No possible side effects.
- 19411 Usability: Users cannot copy error messages while not being aware of the error log
Redesign of the error message dialog.
No possible side effects.
- 19418 Facebook timestamp incorrect
Adding user's time zone offset to a message's date headers and its received date.
No possible side effects.
- 19420 IE8: Some of the Contacts get distorted after adding contacts from the 'New' option
Same cause as bug #19441.
No possible side effects.
- 19421 Default view changes in the configuration are not reflected until after refresh
Setting the correct view after changing it at the configuration.
No possible side effects.

- 19424 Updating to latest version disabled mail account plug-in
Fixed by marking the static.conf as configuration file.
No possible side effects.
- 19427 folder name collision not detected
Fixed folder name detection for duplicates.
No possible side effects.
- 19428 HTML-mail not displayed in webmailer
Using HtmlCleaner library to generate a well-formed and pretty-printed HTML because JTidy fails to do so.
No possible side effects.
- 19433 Add mail account plug-in does not trigger up-sell on missing rights
Added permission check to the plug-in.
No possible side effects.
- 19438 Created shared folder stays visible after deletion (and is recreated after server restart ?)
Properly cleaning system-wide known folders from virtual tree tables.
No possible side effects.
- 19441 taskOpen: "TypeError: attempt to run compile-and-go script on a cleared scope"
Fixed JS warning "TypeError: attempt to run compile-and-go script on a cleared scope" thrown after opened a pop-up window.
No possible side effects.
- 19442 OXTender cannot be installed if language is set to english
The OXUpdater now provides a fallback mechanism that delivers files in en_US if the users preferred language is not available.
No possible side effects.
- 19449 no iphone 4 mentioned in the "standard" wizard tab
Only show iPhone instead of all versions.
No possible side effects.
- 19453 Mails can not be saved when using "Embedded windows"
Fixed panel button.
No possible side effects.
- 19454 Using "" character in mail filter condition removes vacation message
Fixed quoting problem.
No possible side effects.
- 19455 portal can not be switched off
Explicitly checking for the module portal now.
No possible side effects.
- 19458 LinkedIn: Wrong Password. when opening the Social Settings
Use secret service everywhere.
No possible side effects.
- 19459 OX immediately dies when running interface tests
Changed session-bound LIST/LSUB cache to user-bound one. Thus changes are available for all active sessions without the need for propagating throughout sessions.
No possible side effects.

- 19461 First mail is selected but doesn't become focused
Set the focus to the list.
No possible side effects.
- 19462 Mail folder unread status is reset when selecting a second mail
Set unread count in returned IMAP mail.
No possible side effects.
- 19463 ical parser breaks when accepting appointment invitation from windows phone
Fixed iCal parser to accept also broken iCals.
No possible side effects.
- 19464 No external Mail addresses in "New E-Mail" pop-up windows using IE8/IE9
Wrong method call. Firefox caught this, Internet Explorer breaks.
No possible side effects.
- 19465 Guided Tours need to honor Module Permissions
Consider of module permissions in the guided tours.
No possible side effects.
- 19466 HTML tags used in Plaintext part AND strange]]> markup in HTML mails
Proper replacement of ' HTML entity.
No possible side effects.
- 19467 "Add"/"Remove" buttons in "Select Attachments" pop-up window overlaps "Attachment" string
Clean-up of that dialog and removed the string 'Attachment' completely.
No possible side effects.
- 19468 Creating new folders does not suggest free name and simple views get messed up on duplicates
Guessing the next free name (e.g. 'New Folder 3').
No possible side effects.
- 19474 Root mailfolders aren't stored as root mailfolders if imap server supports this through Altnamespace
Fixed moving a mail folder if altnamespace enabled.
No possible side effects.
- 19476 Distorted Close Dialog seen when trying to close a new email
Fixed timing issue on closing the window.
No possible side effects.
- 19478 With Hover enabled for email, paperclip icons appear that were not present before
Fixed that all views are in sync now.
No possible side effects.
- 19483 Icons from the tool box in the Composer window get disappeared if kept idle for some time.
Correctly locate and address the active document in the editor.
No possible side effects.
- 19484 Caldav Series omits one occurrence
Calculate correct until date when it occurs after the appointment.
No possible side effects.

- 19485 Unable to empty contact fields
There was an error in detecting fields which should be removed.
No possible side effects.
- 19492 Deleting very large contexts is not possible because database timeout occurs
Enhanced DatabaseService with a method to get a no-timeout connection for administrative access to contexts.
No possible side effects.
- 19494 Large folders take a long time to load, the more messages, the longer it takes
Improved performance by reducing IMAP command. Additionally avoid a unnecessary request from the GUI.
No possible side effects.
- 19495 listfilestore gives all zero values if server identifier is something else than 2
listfilestore now works again if server_id something else than 2.
No possible side effects.
- 19496 Leading]]> in HTML mails
Removing CDATA sections by disabling HtmlCleaner's "useCdata" parameter.
No possible side effects.
- 19497 forwarding mails from within unified inbox not possible
Setting proper "msgref" attribute.
No possible side effects.
- 19498 UWA widgets visibility auto-set to disable upon any configuration changes
Fixed accidentally overwritten configuration value.
No possible side effects.
- 19504 Assistant field not synced correctly
Don't overwrite the assistant field.
No possible side effects.
- 19512 plain text part of a mail is empty
Fixed mail composing.
No possible side effects.
- 19513 OXTender1 cannot be deinstalled after Outlook update to 2010
Allow deinstallation even if Outlook 2010 is installed.
No possible side effects.
- 19514 mail backend tries to move spam messages to the confirmed spam folder even if createConfirmedSpam=false
No copy to confirmed-spam folder its creation is denied as per createConfirmedSpam=false.
No possible side effects.
- 19515 English installation of infostore implementation, shows JA - Nein window
Fixed translation issue.
No possible side effects.

- 19522 Mail cannot be parsed. Invalid or incomplete mail data.
Added support for hexadecimal entities like ü
No possible side effects.
- 19527 Links in emails open another OX tab and not the link itself
Re-added a by mistake removed function.
No possible side effects.
- 19529 Save MAPI provider settings into registry does not work
Fixed setting of log level in the registry.
No possible side effects.
- 19531 "Mark folder read" doesn't update the folder
Check for a possible null instance.
No possible side effects.
- 19533 Calendar printing throws JS error
Used wrong reference to the window object.
No possible side effects.
- 19534 can not login to OX after created an new email account with incorrect fields
Fail for invalid transport server, too.
No possible side effects.
- 19537 font size is not applied when edit email
Already fixed with bug #19248.
No possible side effects.
- 19540 Distribution List is not displayed
Applying proper flag to contact instance if considered as distribution list.
No possible side effects.
- 19544 error occurred when sign out
Ignore errors on logout. Just get the user out.
No possible side effects.
- 19545 please add China currency in new task estimated cost
Added China currency and added it to the translation process.
No possible side effects.
- 19546 Relogin failure after entering SMTP Server name in particular format of remote account.
Fixed with bug #19534.
No possible side effects.
- 19550 Composer is not showing the previously saved priority after opening the draft
Correctly identify and set the priority in draft mails.
No possible side effects.
- 19557 IE7: "Show Source" only two columns high
The problem is that IE7 can't handle the textarea height in strict mode.
Using a pre tag instead of a text area now.
No possible side effects.

- 19560 Subscript and superscript characters are not displayed in message body while viewing message
Added missing tags to 'whitelist.properties' file.
No possible side effects.
- 19562 Excel-attachments replaced by rtf-files with mail content
Showing proper TNEF attachments if present.
No possible side effects.
- 19565 Dialog gets distorted when closing inline windows after minimizing and maximizing them
Correctly mark the window as visible.
No possible side effects.
- 19566 Warning thrown when deleting IMAP folders
Proper detection if a global folder is deleted.
No possible side effects.
- 19571 Subscribing POP3 E-Mail account throws a lot of error messages
Resolved warnings when creating a POP3 account
No possible side effects.
- 19574 Mail Compose API ignores priority
consider of mail priority on mail compose.
No possible side effects.
- 19575 Chrome 12: Unable to print
Fixed timeout issue in Chrome.
No possible side effects.
- 19579 IE: Main folder icon too big
Need to set width and height.
No possible side effects.
- 19584 courier imap doesn't work
Properly dealing with a CommandFailedException and switching fetch profile.
No possible side effects.
- 19591 Subscribing Yahoo mail accounts does not work
Dealing with failing retrieval of a POP3 server's capabilities (through CAPA command).
No possible side effects.

Additional fixes without bug numbers:

- 'Direct Links' in mails won't be shown with the complete URL anymore
- Disabled modules in the top module bar will be shown with an additional locked icon
- TA7369 of US6559: Changed user attributes now go through a different algorithm and then only real changes are applied to database.

4. Changes relevant for Administrators

Changes of Configuration Files

Change #711 – Introduced configuration option to restrict number of concurrent connections to subscribed/external IMAP accounts

Caused by GMail error that too many connections were opened. Therefore introduced a configuration option to restrict number of concurrent connections to subscribed/external IMAP accounts:
com.openexchange.imap.maxNumExternalConnections

Notation is a comma-separated list of: <host> + ':' + <max-count>; e.g.:
"com.openexchange.imap.maxNumExternalConnections=imap.host1.com:4,imap.host2.com:6"

For convenience a max-count can be specified which applies to all subscribed/external IMAP accounts; e.g.:

"com.openexchange.imap.maxNumExternalConnections=4"

Zero or less is interpreted as unlimited.

By default unlimited concurrent connections are allowed.

Change #711 – Disable contact picture in mail view

Showing the contact picture in mail view requires an email address based search. This might cause load on some backend, esp. those which directly connect to LDAP. Therefore, admins need a configuration to disable this feature.

New configuration options:

ui/mail/showContactImage/value = true/false

ui/mail/showContactImage/configurable = true/false

Change #740 – Added Czech and Hungarian translations for standard mail folder names

The configuration file `/opt/open-xchange/etc/admindemon/User.properties` will be extended with the following lines:

Czech

```
SENT_MAILFOLDER_CS_CZ=Odeslan\u00e9 polo\u017eky
TRASH_MAILFOLDER_CS_CZ=Ko\u0161
DRAFTS_MAILFOLDER_CS_CZ=Koncepty
SPAM_MAILFOLDER_CS_CZ=Spam
CONFIRMED_SPAM_MAILFOLDER_CS_CZ=Potvrzen\u00fd spam
CONFIRMED_HAM_MAILFOLDER_CS_CZ=Potvrzen\u00e9 norm\u00e9ln\u00e9
po\u0161ta
```

Hungarian

```
SENT_MAILFOLDER_HU_HU=Elk\u00fcd\u00f6tt elemek
TRASH_MAILFOLDER_HU_HU=T\u00f6r\u00f6lt elemek
DRAFTS_MAILFOLDER_HU_HU=Piszkozatok
SPAM_MAILFOLDER_HU_HU=Lev\u00e9lszem\u00e9t
CONFIRMED_SPAM_MAILFOLDER_HU_HU=Elfogadott k\u00e9retlen
CONFIRMED_HAM_MAILFOLDER_HU_HU=Elfogadott \u00e9l-k\u00e9retlen
```

Change #741 – Allow auto-refresh of portal page

New configuration allow refreshing the portal whenever a user enters the view. Because this might cause high traffic on some installations, this behavioral change can be configured. The default is old behavior. Configuration is in `ui.properties`: `ui/portal/autoRefresh = false`

Change #746 – Disable upsell for specific features

Some customers want upselling but not for all features, e.g. infostore.

```
New server configuration (ui.properties)
ui/global/disableUpsell/<feature>
for example
ui/global/disableUpsell/infostore
```

As of today, UI core only supports portal and infostore.

Change #748 – Optional new subscribe-yahoo oauth package

In the process of turning our subscription systems over to API based subscribers, we created a new yahoo subscriber using OAuth and the Yahoo APIs. This is a replacement for the old crawler-based subscription source. A new update task

"com.openexchange.subscribe.yahoo.update.DeleteOldYahooSubscriptions" has been introduced to remove all crawler based yahoo subscriptions. Since this is too radical a step for a public PTF, the new subscriber "open-xchange-subscribe-yahoo" is an optional package, and the update task is excluded via the "excludedupdatetasks.properties" configuration file.

== As an administrator, what do I have to do? ==

If you don't use subscriptions anyway, don't do anything.

If you provide yahoo as a valid subscription source, but would like to keep the old subscriptions, with all the limitations of the crawler based subscriptions (i.e. vulnerability to changes on the web pages and being generally error prone), don't do anything.

If you want to provide a reliable, API based Yahoo subscription source (or are reasonably sure, that no yahoo subscriptions exist anyway, since, for example, they were disabled up until now), install "open-xchange-subscribe-yahoo" and comment out the line

"com.openexchange.subscribe.yahoo.update.DeleteOldYahooSubscriptions" in the "excludedupdatetasks.properties" file. Note though that this removes all existing yahoo subscriptions, so your users will have to recreate them, using the new 6.20 OAuth mechanisms.

Change #753 – Configuration parameters for Password Change.

A new configuration file will be added: passwordchange.properties.

The following parameters will be added:

com.openexchange.passwordchange.showStrength=false
Show a widget, which displays the current password Strength while entering.
(default: false)

com.openexchange.passwordchange.minLength=4
The minimum length of an entered password. (default: 4)

com.openexchange.passwordchange.maxLength=0
The maximum length of an entered password. 0 for unlimited. (default: 0)

com.openexchange.passwordchange.regex=[^a-z0-9]
Defines the class of allowed special characters as Regular Expression. (default: [^a-z0-9])

com.openexchange.passwordchange.special=\$, _, or %
Shows an example of allowed special characters to the user. Should be a subset of "regex" in a human readable format. (default: \$, _, or %)

Changes of Database Schemes

- none -

Changes of Command Line Tools

Change #744 – Introduced command-line parameter to switch off portal (--access-denied-portal)

Fix for bug #19455 requires to introduce a new command-line parameter to switch off portal (--access-denied-portal).

Please consider the different semantic than other command-line on/off options. If turned on, the portal is off. This is required for consistency reasons.

Option description:

--access-denied-portal: Denies portal access (Default is off)

Changes of Behavior

Change #738 – Fixed usability issues with error notifications and the error log window

Users became desparate while trying to copy error messages or taking screenshots of notification windows. However, lots of users are not aware of the error log window which simplifies copying messages.

Now, errors and warnings contain a link that opens the error log. This one now contains some environment information that help understanding potential bugs. Moreover, the error log window allows sending emails as bug reports directly.

Changes of Packaging

Change #742 – open-xchange-subscribe-crawler-offering removed

The package open-xchange-subscribe-crawler-offering was an experimental bundle. It is not developed further, so has to be removed.

== As an administrator, what do I have to do ==

Uninstall open-xchange-subscribe-crawler-offering if it is installed in your system

Change #745 – 2 new Bundles for Yahoo (OAuth- & API-based now, replacing functionality in c.o.subscribe.crawler)

2 new bundles:

- c.o.oauth.yahoo
- c.o.subscribe.yahoo

2 new config-files:

- yahoooauth.properties (where the API-Keys need to go)
- yahooseubscribe.properties (enable / disable Yahoo contacts serverwide)

Please note that similar to facebook and msn the API-Keys are domain-specific.

Documentation on how to obtain the API-Keys will be available soon. Until then see : <https://developer.apps.yahoo.com/projects>

What will disappear from com.openexchange.subscribe.crawler?

- the crawler-configuration in file
c.o.subscribe.crawler/conf/crawlers/yahoo.com.yml
- the line to enable / disable the pld crawler in file
c.o.subscribe.crawler/conf/crawler.properties.in
- the accompanying unit-test

5. Changes relevant for Developers

Changes of the HTTP API

Change #739 – Two new read-only configuration parameters "active" and "module" have been introduced for the OXUpdater module.

The parameters can be accessed via the config-modules API. `modules/com.openexchange.oxupdater/module` always returns true if the OXUpdater bundle is installed and started. `modules/com.openexchange.oxupdater/active` returns true if the user has permissions to download the OXUpdater (at the moment this is WebDAVXML or OLOX20 permission). Otherwise it returns false.

Changes of the RMI API

- none -

Changes of the WebDAV API

- none -

Changes of the GUI-API

Change #749 – Two new widgets: `ox.Configuration.Tabs` and `ox.Configuration.Tab`

Two new widget classes are added to the Plugin API: `ox.Configuration.Tabs` and `ox.Configuration.Tab`. A `Tabs` widget must be the only top-level child of an `ox.Configuration.Page` (or `VSplit`) and displays multiple `Tab` widgets as user-selectable tabs. This change is backwards compatible.

6. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

7. Side effects

No side effects.

8. Known Bugs

Here is an overview of major bugs recently reported.

Fixes for the following effects are scheduled for another Public PTF, scheduled for July 2011:

- 14653 Accepting/Declining an appointment in OL2003/2007 generates "changed appointment"-mails
- 19109 Appointments not shown in daily view in shared calendars
- 19591 Subscribing Yahoo mail accounts does not work
This is perhaps a problem on yahoo side.

The following effects will be addressed with a future major release:

- 16879 No connection to WebDav in Windows 7 (32- & 64-bit)
- 18768 Published e-mail attachment cannot be found
- 19014 For huge calendars the OX server may die with an OutOfMemoryError while using the webdav.ical interface
- 19128 User can not change his personal data
- 19389 Change Context properties (mappings and/or name) is not always reliable

The following effects relate to the OXtender for Business Mobility. They are currently being reviewed and are candidates for a future PTF.

- 19508 NPE at
com.openexchange.usm.datatypes.tasks.calendar.ParticipantIdentifier.equals(ParticipantIdentifier.java:155)
- 19517 Forwarded mails contain no body (at least on Android)
