

**Release Notes for
Public Patch
Release 1621
(2013-09-05)**

2. Origin Product/Version

Open-Xchange Server 6 backend 7.2.2-rev18
Open-Xchange AppSuite backend 7.2.2-rev18

3. Packages shipped with this Patch Release

Open-Xchange Server 6 backend 7.2.2-rev19
Open-Xchange AppSuite backend 7.2.2-rev19

4. Bugs Fixed with this Patch Release

28673 Warning dialogue is displayed after a successful password change

To generate a notification message for users to re-login after a successful password change, a response code of type "error" was used. This led to several issues with clients that implement a password change workflow. We have reverted this change (Bug #28097) to ensure stability of external clients. The user notification will be solved less intrusively with a regular upcoming release.

5. Changes relevant for Administrators

Changes of Configuration Files

- none -

Changes of Database Schemes

- none -

Changes of Command Line Tools

- none -

Changes of Behavior

- none -

Changes of Packaging

- none -

Changes of Front-End Customizations

All CSS changes and a list of new and changed icons can be found on our wiki page documenting the Theme changes for each version: <http://oxpedia.org/wiki/index.php?title=ThemeChanges>

6. Changes relevant for Developers

Changes of the HTTP API

Instead of an error message, a success message will be returned on successful password change. This has been the behavior with 7.2.2-rev17 and before.

Changes of the RMI API

- none -

Changes of the SOAP API

- none -

Changes of the WebDAV API

- none -

Changes of the GUI-API

- none -

7. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.

8. Fixed Bugs
