

Release Notes for Public Patch Release #1095 (2012-07-26)

1. Origin Product/Version

OX6 v6.20.6 Rev 3

2. Packages shipped with this Patch Release

Open-Xchange Server 6 Mobility Packages (built 2012-07-25)

3. Bugs Fixed with this Patch Release

OXtender for Business Mobility

22329 Orphaned appointments and possible data loss with iOS appointment handling

Delete appointment on client (and send new MeetingRequest) if participant status was reset by the OX server.

22671 USMParseRequestException: Expected START_TAG(Supported) at START_TAG <null>

The USM implementation of the protocol was missing one field("IMAddress3") in the WXML-Tag-Table "Contacts2" of the EAS protocol. This lead to the problem that a parsing of client requests that used the last tag-name in that tag-table ("MMS") produces a parse error. Apparently no client until now was capable of synchronizing this field.

4. Changes relevant for Administrators

Changes of Configuration Files

- none -

Changes of Database Schemes

- none -

Changes of Command Line Tools

- none -

Changes of Behavior

- none -

Changes of Packaging

- none -
