3. Bugs fixed with this Patch Release

23553 AJP timeout exceeds for file upload

Uploading files failed if the upload duration hit the default timeout for AJP connections to the backend. This may happen for slow upstream connection speeds or huge files that are uploaded. The issue has been fixed by avoiding "zero" as a response to a file upload if it exceeds the limit. Before the fix, this caused the web server to cancel the upload process.

5. Tests

The OX QA team has verified all bug fixes.

To avoid side effects the packages have gone through automated smoke and regression test on both, the OX Build System and a distributed OX QA server setup.

In addition all bug fixes have been checked for potential side effects or changed behavior. Unless explicitly stated with one of the bug entries above, we do not expect other side effects.
