To get a list of all fixed issues, please have a look at all Release Notes.

3. Parallel Setup OX SE UI and OX App Suite UI

With the release of OX SE / App Suite for Univention Corporate Server, it is possible for customers and partners to provide both user interfaces.

The default configuration for these frontends are shown on the overview page:

(https://<IP address of the OX system>/) and may be used simultaneously. By setting UCR variables either of those frontends may be deactivated.

To disable the App Suite frontend run the following command:

$ ucr set ox/frontend/appsuite/enabled=no

and to disable the OX6 frontend the following command has to be called:

$ ucr set ox/frontend/ox6/enabled=no

Open-Xchange has created an announcement list containing all information relevant to OX App Suite. Details of all upcoming releases, and other relevant information, are available through the mailing list. You can subscribe to the list via the Open-Xchange License Database.

4. Update Path

The following steps are necessary to update a UCS 3.0-2 system with OX SE for UCS 6.20.7 to UCS 3.1 with OXSE v6.22.2 / App Suite v7.2.1 for UCS:

- **Update to UCS 3.1-1:** The update can be started by the **UMC module Online update** or by the command line tool univention-upgrade. Further details about the update are described in the UCS manual. After the update to UCS 3.1, the OXSE for UCS installation will be automatically reconfigured to use the Univention App Center for further updates.

- **Installation of the latest UCS errata updates:** The errata updates can be installed with UMC module Online update → Package Updates or by the command line tool Univention-upgrade.

- **Update of the "Open-Xchange Server Edition" via the App Center:** Now the "Open-Xchange Server Edition" can be updated to version 7.2 with the UMC module App Center. Where necessary, a key identification (Key ID) has to be added to the UCS license. This is done via a special wizard when updating or installing the "Open-Xchange Server Edition" in the App Center.

- **Installation of Package Updates:** The last step is to ensure, that the latest package updates are installed (with the UMC module Online Update → Package Updates or via the command line tool univention-upgrade).

All further updates for OX SE / App Suite for UCS will be available in Univention App Center. Please check the UMC module App Center for updates of the application Open-Xchange Server Edition / OX App Suite.
