Release Notes for Patch Release #1858

February 11, 2014

Copyright notice

1   Shipped Product and Version

Open-Xchange AppSuite EAS 7.4.1-rev6

2   Bugs Fixed since previous Public Patch Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1842.

30838   EAS does not honour Win8/Win7 Mobile empty sync requests (Status 4 == protocol error)
EAS was not parsing correctly empty requests with empty xml body.
This has been fixed by correctly parsing the empty request (no tag at all) and using the already saved previous sync.

3   Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.
   To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.
   All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4   Fixed Bugs
