1 Shipped Product and Version

Open-Xchange OXtender 2 for Microsoft Outlook 7.2.6

Open-Xchange OXUpdater 6.18.25

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 7.4.2.

30558 Exception occurred during communication with OX server

Due to high load or too many threads on the backend a request time-out occurred between OX and USM.

This was fixed by retrying this several times because the error is only temporary.

3 Tests

Not all issues that got resolved with this Patch Release could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported issue when deploying to a staging or production environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

30558,
