1 Shipped Product and Version

Open-Xchange AppSuite frontend6 6.22.6-rev10

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #1899.

31428   Cannot send E-Mail using IE8
Internet Explorer 8 throws an exception if an input element is focused too early, which breaks subsequent script execution. A solution for another bug introduced such a focus call. Stopping the script execution is now avoided by a try/catch block for this kind of exception in favour of IE8.

3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

   To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

   All bug fixes have been checked for potential side effects and changed behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
