1 Shipped Product and Version

Open-Xchange AppSuite backend 7.4.2-rev38

Open-Xchange AppSuite USM 7.4.2-rev14

2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2209.

31044 No cached DataObjects for client available
Polling mechanism for the users inbox in ping-handler did not check for all errors during polling. This has been fixed by catching all possible errors, make sure that polling is only performed in configured interval regardless of client behavior.

35023 SST_FOLDERCONTENTS_IMPORT error 0x800d0002
A possibly absent user permission bits entry leads to a null dereference.
Solution: Orderly deal with absent user permission bits.

3 Tests

Not all issues that got resolved with this Patch Release could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported issue when deploying to a staging or production environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

31044, 35023,
