# 1 Shipped Product and Version

Open-Xchange AppSuite EAS 7.6.1-rev8

# 2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2302.

**36075 Active sync broken on Windows Mobile after accepting a previously modified invitation**
Windows 8.1 mobile devices send sync with wait option. Explicit (manual) sync's increment the synchronization Timestamps. As a result the parallel waiting sync uses too "old" synchronization Timestamps and the error "invalid sync key" is emitted.
This has been fixed by discarding the results of the waiting sync in favour of the explicit (manual) sync.

# 3 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

# 4 Fixed Bugs

36075,
