2 Bugs fixed since previous Public Release

This document provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2732.

40775 Wrong user name capitalization
Possibly wrong user name capitalization used to look-up existing users.
Solution: Also user lower-case user name when checking for existing users with such a user name.

40929 Mail autoconfig fails for IDN domains
Autoconfig for email fails with vowel mutation in domain name.
This has been fixed by leaving domain as ascii instead of converting to unicode before processing.

3 Changes relevant for Administrators

3.1 Changes of Database Schema

Change #2714 Fixed PRIMARY KEY definition for ”snippetAttachment” and added new ”snippetAttachmentBinary” table
The PRIMARY KEY definition for "snippetAttachment" table is changed to consist of the columns "cid", "user", "id", and "referenceId" to support having multiple attachments per snippet. For storing binary attachment data in database, the table "snippetAttachmentBinary" is added to database schema layout:

```
CREATE TABLE ‘snippetAttachmentBinary‘ (
‘cid‘ int(10) unsigned NOT NULL,
‘referenceId‘ varchar(64) CHARACTER SET latin1 NOT NULL,
‘data‘ mediumblob NOT NULL,
PRIMARY KEY (‘cid‘, ‘referenceId‘)
) ENGINE=InnoDB DEFAULT CHARSET=utf8 COLLATE=utf8_unicode_ci
```

4 Tests

The Open-Xchange QA team has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

5 Fixed Bugs
