2 Bugs fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #2840.

41752 Proper user name not used on vacation reply

When creating vacation notes, the "from" attribute was not added to the SIEVE filter. As a result, automated replies did only use the plain mail address. The "from" tag has been introduced now and more information is available at Change 2814.

42202 Add more verbose logging for images that gets refused to be processed

Exception message did not include the actual resolution or total size of the image that was rejected being transformed.

Append total size or current resolution to exception message (if known). Examples: "Image transformation denied. Size is too big. (current=8388608, max=5242880)" and "Image transformation denied. Resolution is too high. (current=24087962, max=12087962)".

41990 Add Subscription checkbox overlap with text

The Checkbox in Subscriptions overlapped the info text.
This was fixed and now the checkbox is displayed beside the info text.

42254 Apps in search not translated in mobile view

Some strings for mobile search was not translated.
Now all those strings are translated with supported languages.

42034 Blue bar in address book entry when double clicking on Contact Picture

This issue with image marking in some browsers were fixed by a changing css styles.

41444 Calendar- typing error when adding new calendar

Typo "entprechende" instead of "entsprechende is now fixed.

41800 E-Mail address cut-off in mail compose

When using the new mail compose and typing a long mail address, the resulting text is cut. This has been caused by incorrect calculation of the input box size and solved by fixing the related bootstrap library.

42006 Dangling links and malformed 'Subscribe' dialog

The Checkbox in Subscriptions overlapped the info text.
This was fixed and now the checkbox is displayed beside the info text.

42126 Forwarding mails with no subject and body removes attachment

It was possible that attachments are not attached to an email when forwarding them from a scanner.

With the fix this behavior is fixed and the attachment is attached to the forwarded mail.

41818 Guided Tour: bubbles misaligned missing, text hiding areas which are being explained

Adjusted some behavior, now some disturbing effects are fixed.

42017 Mail is alternating shown as read unread

The message widget on the portal loads the message body which marks a message as seen automatically. This could introduce some kind of going back and forth client-side. This has been fixed by fetching message preview with "unseen=true" to keep unseen messages unseen.

42096 Participants are recognizable in private appointments

Participants were recognizable in private appointments by a third person if an conflict existed. This has been fixed by hiding owner of private appointments in conflicts dialog.

41975 Save mail as draft: page loads endlessly

Saving an email as draft, after inserting in recipient field 'To' an email address that has a blank symbol, the UI get stuck.

Now an error is displayed if the user try to save an email as draft with an broken email-address.

42256 Show all fields in contact edit dialog actually removes fields

Some contact details were hidden after switching to "show all fields" in edit mode.

Now all possible fields are displayed.

42092 Switching to text only mail changes signature

Unwanted trailing whitespace when copy&paste signatures out of html pages.

This has been fixed by removing them but keep the wanted ones.

42005 Update and Deactivate Link-Button for subscription missing

Update and Deactivate Link-Button for subscription were not displayed in the settings area.

This has been fixed by reintroducing refresh and deactivate button for subscriptions.

3 Tests

Not all defects that got resolved could be reproduced within the OX QA lab. Therefore, we advise guided and close monitoring of the reported defect when deploying to a staging or production environment. Defects which have not been fully verified, are marked as such.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.

All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs

41752, 42202, 41990, 42254, 42034, 41444, 41800, 42006, 42126, 41818, 42017, 42096, 41975, 42256, 42092, 42005,
