Release Notes for Patch Release #3569

September 26, 2016

Security Patch Release

This Patch Release addresses critical vulnerabilities; please consider deploying it as soon as possible. Not deploying this Patch Release may result in remote service exploitation, security threats to users and exposure of sensitive data.

Detailed vulnerability descriptions will be publicly disclosed no earlier than five (5) working days after public availability of this Patch Release. There is no indication that one or more of these vulnerabilities are already getting exploited or that information about them is publicly circulating.

1 Shipped Product and Version

2 Vulnerabilities fixed since previous Public Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Patch Release #3519. Solutions for vulnerabilities have been provided for the existing code-base via Patch Releases.

48230   CVE-2016-7546
CVSS: 5.4

48231   CVE-2016-7546
CVSS: 4.3

48282   CVE-2016-7546
CVSS: 2.2

48559   CVE-2016-7546
CVSS: 4.3

3 Changes relevant for Operators

3.1 Changes of Behaviour

Change #0000   Compatibility with Google Chrome on macOS
Due to IME (input method editor) changes at Google Chrome we had to restrict compatibility of OX Documents on macOS to Google Chrome 53 or newer in order to avoid corrupted documents. In case a users tries to edit a file in OX Documents with an older version, the file is opened as "read-only" and a notification is shown.

4 Fixed Bugs

48230, 48231, 48282, 48559,
