## 2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #3629.

### **48292 Usercopy fails with "Unexpected problem occurred"**

UseCountCopyTask used a wrong mapping object and tried to copy use counts of internal users and usercopy failed.

This has been fixed by using the correct mapping object and skip use counts of internal users.

### **48495 New arriving mails are sorted somewhere into existing mails in list view**

Sort handler was called before models were drawn and list were messed up.

This has been solved by skipping sort when queue contains items and sort manually once the queue has been processed.

### **49083 E-Mail-Folder Action 'delete all messages' ignores OVERQUOTA**

Copy command was able to run into overquota.

This has been fixed by using move operation for clear folder command in case move operation is supported by imap server.

### **49196 Users can not be added to group**

It was not possible to add a user to a group containing a space in the name and were created by the command line tool.

This has been solved by using CHECK\_GROUP\_UID\_REGEX property for group name validation during http-api calls.

## 3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.

To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

## 4 Fixed Bugs

48292, 48495, 49083, 49196,
