2 Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #3950.

51859 Changed API behaviour leads to issues with file uploads
An earlier bugfix introduced a significant change to HTTP API behaviour, any change to the MIME-Type parameter has been rejected as a result. While OX clients were unaffected, this led to an incompatibility with third-party clients when using the ”infostore” API for uploading and modifying files. We reduced the scope of the change to block MIME-Types that start with ”multipart” instead, this should not affect the vast majority of use-cases for this API.

3 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4 Fixed Bugs
