2   Bugs fixed since previous Public Release

This section provides a summary of bug fixes and changes that have been applied subsequently to shipping Patch Release #4317.

55251   Unused libraries were shipped
Removed unused libraries from "com.openexchange.preview" bundle.

55171   Mail Modules does not render thumbnails for .tif and .psd
Missing handling for psd and tiff in mail preview.
This has been solved by adding psd and tiff to preview list.

55096   Dragging a folder into Drive in App Suite UI results in unspecific error
Wrong folders detection on MS Windows.
Improved detection to solve this issue.

55075   Attendent can change the participant status of appointment creator in shared calendar
UI changed response so it looked like the currently logged in user confirmed the appointment.
This has been fixed by using the actual user that confirmed instead of the currently logged in user.

55012   "Email has no recipient" message is shown after deleting a duplicated recipient
This was caused by same identifier in collection.
This has been fixed by using uniqueId so there are no same identifiers anymore.

54879   Quotes in email local part not allowed
Possible quotes "" in local part of an E-Mail address were handled as special characters.
Now orderly handle quotes "" in local part of an E-Mail address to solve this issue.

54232   File names are case sensitive
The filename reservation logic recorded possibly conflicting filenames in a map using case-sensitive keys.
This has been solved by tracking possibly conflicting filenames ignoring case.

3   Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.
To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server set-up for system and integration testing. All changes have been checked for potential side-effects and effect on behaviour. Unless explicitly stated within this document, we do not expect any side-effects.

4   Fixed Bugs

55251, 55171, 55096, 55075, 55012, 54879, 54232,
