Release Notes for Public PTF (2009-08-12)

1. Origin Product/Version

OXHE v6.10.0 Rev 6

2. Packages shipped with this PTF Release

OXHE v6.10 Rev 7 (built 2009-08-03/2009-08-10)

3. Bugs fixed with this PTF Release

14177   missing common shell functions file on update from RC3 to RC4
Fix: Another fix for the new UCS detection.
No potential side effects.

14178   user management broken when using non ascii chars in user names
Fix: Additionally to the checks on the database if some name already
exists a check in software is added with String.equals(). This method is
able to detect differences like umlauts or accents. Additionally the
database must be changed to distinguish those different login names.
The column uid of table login2user must be changed by using now the
collation utf8_bin instead of utf8_unicode_ci. This update task should
run quickly because only the collation is changed.
No potential side effects.

14207   wrong exit code from init script if you stop an already stopped service
Fix: stop function to return 0 instead of 7 to be LSB compliant.
No potential side effects.

14211   "Mail account is not a number:" after Update to 6.10
Fix: Using static delimiter character '/' to separate mail account part
form fullname part within a mail folder identifier. Thus mail folder prefix
contained in full identifier follows the same pattern and is easy to
detect.
No potential side effects.

14232   Answering mails and saving them as draft will remove original from
Inbox
Fix: Checking if user is working in his default "Drafts" folder prior to
deleting referenced mail.
No potential side effects.

4. Changes relevant for Administrator

Changes of configuration files

- none -

Changes of database schemes

- none -

5. Changes relevant for Developers

Changes of the HTTP API

- none -

Changes of the RMI API

- none -

Changes of the WebDAV API

- none -

6. Tests

To avoid side effects the packages have gone through automated "Smoke" and "Always" test on both, the OX Build System and a distributed OX QA server setup.

The OX QA team has verified all bug fixes.

7. Side effects

No side effects.
