

Release Notes for Public PTF (2010-02-08)

1. Origin Product/Version

OXHE v6.12.0 Rev 7

2. Packages shipped with this PTF Release

OXHE v6.12.0 Rev 13 (built 2010-02-08)

3. Bugs fixed with this PTF Release

- 14846 deletecontext call via soap sends "reconnect to rmi service" failed error
Removed one throw line. Implemented a second call to the rmi method after the reconnect call.
No potential side effects.
- 15108 Mail folder are deleted after folder has been moved
Equal named folder will not be removed when moving some folder.
No potential side effects.
- 14533 Replying to HTML-mails with default mail settings doubles original mail
Fix removes duplicated quoted text when replying to a mail.
No potential side effects.
- 15128 Trying to display a special mail whole the mail module is disabled
The email is broken because it uses the same boundary for the nested mime multiparts. Therefore parsing is very complex because mime multiparts can not be directly distinguished. The fix tries to its best to parse the broken structure.
No potential side effects.
- 15269 mail view produces bufferoverflow
Decoding of some encoded text fails because the allocated buffer for this is too short. The buffers size is estimated which may have caused this issue. This can be finally determined if the input to decode is known and can be verified to be to big for the buffer. The fix catches this problem and logs the input to decode to be able to make this final verification. Additionally a bigger buffer is allocated and the decoding is tried again. It may work now or it may still fail but then we can investigate why it fails. Possible side effects: Still failing decode but the input is logged then.

4. Changes relevant for Administrator

Changes of configuration files

- none -

Changes of database schemes

- none -

Changes of command line tools schemes

- none -

5. Changes relevant for Developers

Changes of the HTTP API

- none -

Changes of the RMI API

- none -

Changes of the WebDAV API

- none -

6. Tests

To avoid side effects the packages have gone through automated "Smoke" and "Always" test on both, the OX Build System and a distributed OX QA server setup.

The OX QA team has verified all bug fixes.

7. Side effects

No side effects.
