1 About this Documentation

The following information will help you make better use of the documentation.

- [Target Groups, Contents \(p. 12\)](#)
- [Terminology \(p. 13\)](#)

1.1 Target Groups, Contents

This documentation is addressed to the end user.

This documentation describes working with a typical groupware installation and configuration. The installed version and the configuration of your groupware might differ from what is described here.

If this documentation contains descriptions of functions that are not available in your installation, please contact your administrator or host. As the groupware's software has a modularized structure consisting of individual applications, it is possible to purchase additional applications or functions through upgrades.

The contents of this documentation are also available in the on-line help.

1.2 Terminology

Account	<p>An account or an user account is an access permission to a computer system. Account examples:</p> <ul style="list-style-type: none">▪ groupware account▪ GMail account▪ DropBox account▪ Facebook account <p>To get access, a user has to log in with the user name and the password. Based on the account, the computer system identifies the single users. This allows to assign specific properties to a user, like access permissions or settings.</p> <p>Related topics: Managing Accounts (p. 249)</p>
App	<p>An application is a groupware component that provides certain functions. Example: With the E-Mail application you can send, receive and organize E-Mails.</p>
Distribution list	<p>A distribution list consists of a distribution list name and a number of E-Mail addresses of internal users or external partners. You can create and edit own distribution lists. Other users can not see your distribution lists. Distribution lists can be used as follows:</p> <ul style="list-style-type: none">▪ send an E-Mail to multiple contacts▪ add internal or external participants to an appointment or a task▪ grant permissions to multiple users or guests by inviting them to a share <p>Depending on the configuration, specific distribution lists are predefined for all users.</p> <p>Related topics: Adding Distribution Lists (p. 114)</p>
Domain	<p>A domain is the address used to open a page on the Internet. Example: <i>www.example.com</i>. A domain is often also referred to as web address or Internet address.</p> <p>Related topics: Using a whitelist (p. 258)</p>
E-Mail thread	<p>An E-Mail thread is an E-Mail conversation The E-Mail thread includes the original E-Mail and all replies. All E-Mails in an E-Mail thread have the same subject. The current E-Mail corresponds to the last reply.</p> <p>Related topics: The E-Mail list (p. 59)</p>
Elements	<p>Elements of the user interface. Example: windows, labels, buttons.</p> <p>Related topics: The User Interface (p. 22)</p>
External participant	<p>A person that is not an internal groupware user but that participates in an appointment or task.</p>
Folders	<p>Folders contain app specific objects. In some apps, folders can also include subfolders. Some folders are preset, other folders can be set up by the user. Folder examples: E-Mail folder, address book, calendar, task folders, Drive folders</p>

	<p>Related topics: Managing Data with Folders (p. 228)</p>
Global address book	<p>Contains the contact data for all internal users. The users can edit their own personal data in the global address book.</p>
Group	<p>A group consists of a group name and a number of internal users. Groups can be used as follows:</p> <ul style="list-style-type: none">▪ add to an appointment or task▪ grant permissions by inviting to a share <p>Depending on the configuration, specific groups are predefined. Depending on the groupware configuration, users can get the permission to create additional groups.</p> <p>Related topics: Managing Groups (p. 170)</p>
Groupware	<p>The software described in this documentation.</p>
Guest	<p>A person who received an invitation to a share by another user or has been added to an appointment or task as external participant. Each guest user belongs to the <i>Guests</i> group. This group can not be changed or deleted.</p>
Internal E-Mail account	<p>Your Groupware E-Mail account You will automatically get this account. You can not delete this account.</p>
Objects	<p>Objects are created and organized by the user. Examples: E-Mails, contacts, appointments, tasks, documents, files, folders, address books, calendars</p>
Participant	<p>A user invited to an appointment or task.</p>
Resource	<p>A resource consists of a resource name, an E-Mail address and an optional description. Resources can be used as follows:</p> <ul style="list-style-type: none">▪ Add to an appointment. You can only add resources that are not used for other appointments.▪ Resource examples: conference room, beamer, car <p>Depending on the configuration, specific resources are predefined. Depending on the groupware configuration, users can get the permission to create additional resources.</p> <p>Related topics: Managing Resources (p. 171)</p>
Session	<p>A session is a connection between a client, e.g. a browser, an E-Mail client or a smartphone app and a server, e.g. the groupware server. A session starts with the login and ends with the logout.</p> <p>Related topics: Displaying or terminating sessions (p. 259)</p>
Tabs	<p>Tabs provide an easy and simple way of keeping the <i>Inbox</i> folder neat. With tabs, incoming E-Mails are saved separated by sender in the <i>Inbox</i> folder. Depending on the configuration, specific tabs are predefined. You can set additional tabs according to your needs.</p> <p>Tabs can only be used in the <i>Inbox</i> folder. If you need further storage options, use the folder view to create E-Mail folders.</p> <p>Related topics: Working with tabs (p. 77)</p>

User	A person working with the groupware. Each user has a username and a password. Each groupware user belongs to the <i>default group</i> . Those users are also called internal users.
User interface	This refers to the groupware user interface. The user interface consists of individual elements. Related topics: The User Interface (p. 22)
Whitelist	A whitelist is a list of domain names or E-Mail addresses that you trust. Related topics: Using a whitelist (p. 258)

2 First Steps

You should have a look at those topics before starting to work with the groupware:

- [Groupware Definition \(p. 18\)](#)
- [Signing in, Signing out \(p. 20\)](#)
- [Changing the Password \(p. 21\)](#)
- [The User Interface \(p. 22\)](#)

You can also have a look at those topics:

- [Keyboard Input \(p. 32\)](#)

2.1 Groupware Definition

Learn which applications are part of the groupware. Get an initial insight into the tasks that can be accomplished using the applications.

Portal

Your information centre for scheduled appointments, new E-Mails or messages from messaging platforms.

- Get an overview of current appointments and new E-Mails.
- Read current messages from your favorite messaging source.
- Follow news from your social networks.

Learn more: [Portal](#) (p. 45)

E-Mail

Send, receive and organize your E-Mails.

- Besides your internal E-Mail account use external E-Mail accounts that you have set up with other providers.
- Find E-Mails with the help of several search criteria. Follow E-Mail threads.
- Use E-Mail folders to organize your E-Mails. Co-operate with your team by sharing selected E-Mail folders.
- Use the other applications by creating a new contact from an E-Mail address or creating a new appointment from an iCal attachment.

Learn more: [E-Mail](#) (p. 53)

Address Book

Organize and maintain your private and business contacts.

- Use the global address book to communicate with internal participants. Create personal address books to keep an overview of your contacts.
- Use address books to organize your contacts. Co-operate with your team by sharing selected address books.
- Use the contacts from your social networks. This enables you to use the groupware as a central collection point for your contacts.
- Work with external partners by sending contact data in vCard format or sharing address books.

Learn more: [Address Book](#) (p. 101)

Calendar

Keep an overview of your private and business appointments.

- Use individual or recurring appointments to schedule meetings and activities.
- Use calendars to organize appointments. Specify the team members who can access selected calendars.
- Use the team view functions to find windows of free time and to check whether resources like rooms or devices are available.
- When scheduling appointments with external participants the iCal functions ensure automated invitation management.

Learn more: [Calendar](#) (p. 127)

Tasks

Schedule and organize your activities.

- Use the due date to organize your tasks. Use the reminder for tasks that are due.
- Manage your team by delegating selected tasks to others.
- Use the tasks folders to organize your tasks. Specify team members who can access selected tasks.
- Use the recurring tasks functions to keep track of recurring activities.

Learn more: [Tasks \(p. 175\)](#)

Drive

Use the file store to centrally manage information or to share information with others.

- Save any files, notes or Internet links. Give your team read or write access to selected document folders.
- Create and edit simple text files.
- Send individual files as E-Mail attachments or links.
- Provide information to external partners by sharing document folders.

Learn more: [Drive \(p. 197\)](#)

Folders and permissions

Folders and their permissions play an important role in exchanging information with other users. Each groupware object is saved in a specific folder. The folder view helps to manage folders and permissions.

- Use personal folders for sorting your E-Mails, contacts, appointments, tasks, and Infostore items.
- Support your team by sharing certain folders with read or write access.
- Benefit from the information of others by using objects in public or shared folders for your work.

Learn more: [Data Organization and Shares \(p. 227\)](#)

2.2 Signing in, Signing out

In order to sign in you need to know the server address, your username and your password. This information is provided by your administrator or host.

How to sign in to the server:

1. Open a web browser.
2. Enter the server address in the address bar. The login window will be displayed.
3. Enter your username and your password. Note that they are case-sensitive.
4. To save your credentials locally, enable **Stay signed in**.

Warning: Only use this option if this machine is used solely by you. When signing in to a public machine do not use this option.

5. Click on **Sign in**.

Note: If you enter the wrong username or password an error message is displayed. Enter the correct information.

If you set up two-factor authentication, an additional page is displayed. Enter the authentication data on this page.

How to sign out:

1. Click the **Settings** icon on the right side of the menu bar. Click on **Sign out**. The login window will be displayed.
Depending on the configuration, there is a **Sign out** icon  on the upper right side of the menu bar.
2. If anyone else has access to the machine, close the browser.

Warning: If you close the web browser tab without signing out, you stay signed in to the server. If another person enters the server address, this person is automatically signed in with your username and has full access to your data.

Always sign out from the server when you are finished working.

Warning: Your credentials might stay in the system memory as long as your browser is open. This can be a security risk. Close the browser to remove your credentials from the system memory.

3.3 Receiving Notifications

You can configure the groupware to receive notifications about the following events:

- new E-Mails
- new appointment invitations
- appointment reminders
- due tasks
- tasks with a due date in the past

Depending on the notification, different actions are triggered:

- When receiving a new E-Mail, you will get a desktop notification.
- For all other events, you will be notified in the notification area.

How to enable desktop notifications about the receipt of new E-Mails:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Click on **Basic settings** in the sidebar.
3. Enable **Show desktop notifications** in the notification area.

Depending on the browser settings, the **Manage browser permissions now** button is displayed. Click the button. You are asked by the browser whether the receipt of notifications should be allowed. Grant this permission.

Note: Depending on the browser, you might have to allow the receipt of notifications in the browser settings for the setting above to take effect. Information can be found in the browser help pages.

How to use the notification area when being notified about new events:

1. As soon as a notification is being received, the **Notifications** icon  shows the number of new notifications. To open the notification area, click the icon.
If the notification area is to be opened automatically upon receipt of new notifications, proceed as follows:
 - a. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
 - b. Click on **Basic settings** in the sidebar.
Enable **Automatic opening of notification area** in the display area.
2. You can do the following:

How to add attachments to an E-Mail in the E-Mail editing window:

1. Select the files to be sent as attachment.
 - To send a local file as attachment, click on **Attachments**. Click on **Add local file**. Select one or several files.
You can also add an attachment by dragging one or several files from a file browser or from the desktop to the E-Mail window and dropping them below the **Attachments** button.
 - In order to use the current version of a file from the Drive app as an attachment, click on **Attachments**. Click on **Add from Drive**.
Open a folder in the *Add attachments* window. Select one or several files. Click on **Add**.
2. You can use the following functions:
 - In order to remove an attachment, click the **Delete attachment** icon .
 - To hide or show the attachments, click the **Expand** icon  on the left side.

Note: An E-Mail attachment can consume more than 25% of storage space than the locally saved file.

Options:

- Depending on the configuration, attached images can be minimized if they exceed a specified number of pixels or a specified file size. To do so, select an entry next to **Image size** on the bottom right side of the attachments
Note: Images can only be minimized directly after having been uploaded. If you open an E-Mail draft or re-load the E-Mail editing window, attached images can no longer be minimized.
- Depending on the configuration, attachments will not be sent when having reached a certain size limit. In this case, the attachment will be saved in the E-Mail attachments folder in the Drive app. The E-Mail includes a link to the attachment.

5.4.5 Sending attachments as link

This function allows to send large attachments by E-Mail. This is how it works:

- The attachments are uploaded to a new folder below **Drive Mail** in the Drive app. The name of this folder corresponds to the E-Mail subject. The folder is shared with a public link.
- The E-Mail recipients receive a link for downloading the attachments.

How to send attachments as link in the E-Mail editing window:

1. Select the files to be sent as attachment.
 - To send a local file as link, click on **Attachments**. Click on **Add local file**. Select one or several files.
You can also add an attachment by dragging one or several files from a file browser or from the desktop to the E-Mail window and dropping them below the **Attachments** button.
 - In order to use the current version of a file from the Drive app as an attachment, click on **Attachments**. Click on **Add from Drive**.
Open a folder in the *Add attachments* window. Select one or several files. Click on **Add**.
2. You can use the following functions:
 - In order to remove an attachment, click the **Delete attachment** icon .
 - To hide or show the attachments, click the **Expand** icon .
3. Click on **Use Drive Mail**. The **Options** button will be displayed.
Click on **Options**. The *Drive Mail options* window opens.
 - To set the expiration date for the public link, click on an entry below **Expiration**.
If you select an expiration date, you can let the attachment be deleted after the expiration date. To do so, enable **delete if expired**.
Note: Depending on the configuration, those functions are optional or mandatory.
 - To protect the public link with the attachments with a password, enable **Use password**. Enter a password. To view the password while entering it, click the icon on the right side in the input field.
 - To receive notifications about certain actions, enable one or several entries below **Email notifications**.
Note: Depending on the configuration, this function might not be available.

Notes:

- Depending on the configuration, there might be a maximum file size for attachments that can be sent as link.
- In the Sent objects folder, the E-Mail is marked with the icon . When viewing the E-Mail, the following information is displayed at the top of the E-Mail text:
 - A link to the folder containing the attachment.
 - Information about the expiration date and a possibly used password.

- To use Unified Mail, enable the function for one or several E-Mail accounts.
- You can display E-Mails in the Unified Mail folder.

How to activate Unified Mail for an E-Mail account:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Accounts**.
3. Click on **Edit** next to an external E-Mail account in the display area. The settings are displayed in a pop-up.
4. Enable **Use Unified Mail for this account**.
Click on **Save** at the bottom of the pop-up.

How to display E-Mails in the Unified Mail folder:

1. Open the Unified Mail folder in the folder view.
2. You can also click on a subfolder of the Unified Mail folder.

Tip: The account is indicated with a label next to an E-Mail's subject in the sidebar.

5.7 Using E-Mail Filters

E-Mail filters help you organize incoming E-Mail messages. An E-Mail filter consists of one or several rules. By setting rules you can e.g. trigger the following actions:

- The E-Mail is moved to a specific E-Mail folder.
- The E-Mail is forwarded to another E-Mail address.
- The E-Mail is marked as read.

In order to use E-Mail filters, proceed as follows:

- Create E-Mail folders.
- Create one or several rules.
- Specify an order for the rules.
- Set if subsequent rules are to be processed when a rule matches.

The following options exist:

- [Creating new rules \(p. 89\)](#)
- [Adding a condition \(p. 90\)](#)
- [Adding an action \(p. 91\)](#)
- [Creating a new rule when moving \(p. 91\)](#)
- [Changing a rule \(p. 91\)](#)

Note: For the following instructions and examples, it is assumed that the complete range of E-Mail filter functions is available. Depending on the configuration, some functions might not be available.

5.7.1 Creating new rules

A rule contains:

- a name,
- one or several conditions,
- one or several actions. You can specify whether one or all conditions are to be met in order to process the actions.

How to create a new rule:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Select the entry **E-Mail** in the sidebar. Click on **Filter rules**.
3. In the display area, click on **Add new rule**. The *Create new rule* window opens.
 - Enter a rule name.
 - Click on **Add condition**. Make a selection from the drop-down menu. Complete the condition details.
 - Click on **Add action**. Select an action from the menu. Complete the action details.
4. You can set whether subsequent rules are to be processed if the rule is met. To do so, enable or disable **Process subsequent rules**.

5.7.2 Adding a condition

A condition helps to define the E-Mails to which the action should be applied. You can set one or multiple conditions.

How to add a condition in the *Create new rule* window:

1. Click on **Add condition**. Make a selection from the drop-down menu. Note the following:
 - In order to use an E-Mail part that is not contained in the list, select **Header**. Enter a header entry in the Name input field. You can read an E-Mail's header by displaying the source data.
 - In order to consider the **BCC** part, select **Envelope - To**. Envelope includes the E-Mail recipients entered in the **To**, **CC** or **BCC** field.
 - In order to use a part of the E-Mail content in the condition, select **Content**.
 - In order to use the date of receipt in the condition, select **Current Date**.
2. Select a criterion from the drop-down next to the E-Mail part. Enter an argument in the input field.
3. You can add further conditions. You can then specify whether one or all conditions are to be met in order to process the actions. To do so, click on **Apply rule if all conditions are met**.

As soon as there is a condition, you can create nested conditions. To do so, click on **Add condition**. Select **Nested condition**.

To delete a condition, click the **Delete** icon  next to the condition.

Example: The following details are used for the condition:

- E-Mail part "Subject"
- Criterion "Is exactly"
- Argument "minutes"

In this case it would be verified whether the subject of an E-Mail exactly matches the argument "minutes". Further examples how to filter E-Mails using the subject:

- Criterion: "contains"
The condition is met if the subject contains the characters in the argument.
Example: The argument is "minutes".
 - The condition is met for the subject "minutes".
 - The condition is also met for the subject "meeting minutes".
- Criterion: "Matches"
The condition is met if the subject exactly matches the characters in the argument. The character string can contain wildcards.
Example: The argument is "minutes*". The "*" character is a wildcard for any characters.
 - The condition is met for the subject "minutes".
 - The condition is not met for the subject "meeting minutes".
- Criterion: "Regex"
The condition is met if the subject contains the characters provided by the regular expression in the argument. Regular expressions allow complex requests. More information can be found on respective sites on the Web. The following, very simple regular expression should give an insight to the topic.
Example: The argument is "organi(z|s)ation". The expression "(z|s)" stands for either the "z" or the "s" character.
 - The condition is met for the subject "minutes".
 - The condition is also met for the subject "organisation".
 - The condition is not met for the subject "Organic".

5.7.4 Creating a new rule when moving

You can create a new rule when moving an E-Mail to another folder. Incoming E-Mails for which this rule applies, will then be moved to this folder automatically.

How to create a new rule when moving an E-Mail

1. Select an E-Mail.
2. Click the **More actions** icon  in the toolbar. Select **Move** from the menu.
You can also use the **More actions** icon  in the detail view.
Select a folder in the *Move* window. Click on the **Move** button.
3. Enable **Create filter rule**. A note with details about the filter is displayed.
Click on the **Move** button. The *Create new rule* window opens.
4. Enter a rule name. You can adjust the conditions or actions. Click on **Save**.
The E-Mail will be moved. The new rule will be created.

- edit a rule's settings: name, condition, actions
- disable, enable, delete a rule
- change the activation order of the rules

How to change existing rules:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Select the entry **E-Mail** in the sidebar. Click on **Filter rules**.
3. To edit a rule's settings, click on **Edit** next to the rule. Change the settings in the *Edit rule* window.
4. To disable a rule, click on **Disable** next to the rule.
To enable a rule, click on **Enable** next to the rule.
5. To change the order, hover the mouse pointer over the **Move** icon  next to a rule. Drag the rule up or down and drop it appropriately.
Note: This function is only available if there are at least two rules.
6. To delete a rule, click the **Delete** icon  next to the rule.

5.8 Searching for E-Mails

In order to search for specific E-Mails, you can use the following search criteria:

- search terms for subject, E-Mail text, sender, recipients, attachment name
- Search terms for a time range. Searches for E-Mails that you received within the time range. You define a valid time range with the following details.
 - The key words today, yesterday, last week, last month, last year
 - The key words for those time intervals: last 7 days, last 30 days, last 365 days
 - A day of the week, e.g. Monday
 - A specific month, e.g. July
 - A four digit date, e.g. 2015
 - A date, e.g. 1/31/2015
 - A date interval, e.g. 12/1/2014 - 1/31/2015
- folders that are to be searched

How to search for E-Mails:

1. Click on the **Search** input field. Additional icons are displayed.
2. Enter a search term in the input field. The search menu opens.
Define the data sources to be searched by clicking on an entry in the search menu.
 - If clicking on the search term or pressing enter, the following data sources are searched: sender, recipient, subject, E-Mail text
 - In order to only search in the subject, click on **in subject**.
 - In order to only search in the E-Mail text, click on **in mail text**.
 - To search within the attachments' file names, click on **in attachment file names**.
 - In order to search for senders or recipients matching the search term, click on a name. You can define whether to search the sender, recipients or both. To do so, click the **Options** icon ▼ next to the name.
 - In order to search for E-Mails within a specific time range, use a valid time range as search term. As soon as a valid time range is recognized in your input, the time range is displayed in the search menu. Click on the time frame.

The search results are displayed in the list that is shown in the display area. For each search result, the folder with the found object is displayed.
3. To select a folder for the search, click the **Options** icon ▼ in the input field. The current folder will be displayed in a drop-down. To select another folder, open the drop-down.
 - If you select **All folders**, all folders and subfolders of the internal E-Mail account are searched. Note: Depending on the E-Mail server, this function might not be available. In this case, only the current folder will be searched, no subfolders.
 - If you select a specific folder or the folder of an external E-Mail account, only this folder is searched, but no subfolders.
4. To refine the search result, enter further search terms: To remove a search term, click the **Remove** icon ✕ next to the search term.
5. In order to finish the search, click the **Close** icon ✕ in the input field.

5.9 Adding E-Mail Accounts

As default, you use your primary E-Mail account in the groupware. If you use further E-Mails accounts like Google Mail, you can access those accounts' E-Mails from within the groupware, by adding those accounts as E-Mail accounts.

How to add an E-Mail account:

1. Click on **Add Mail Account** in the folder view. The *Add Mail Account* window opens.
2. Click an icon. The further procedure depends on the E-Mail account provider.
 - For some providers, a new browser window opens. Log in with your credentials to grant access to the E-Mail account.
 - If the provider asks you for the permission to access the data, grant this permission.
 - For some providers, enter your credentials in the *Add Mail Account* window. Then, click on **Add**. You can also manually enter the required data by clicking on **Manually**.
3. If the E-Mails in this account are also to be shown in the Unified Mail folder, enable **Use unified mail for this account**.

Note: Depending on the configuration, this function might not be available.

An entry for the E-Mail account appears in the folder view. The entry contains this account's E-Mail folders. Open one of those folders to do the following:

- read this account's E-Mails
- send E-Mails from this account

7.2.3 How are appointments displayed in a calendar view?

In a calendar view, the appointment display is defined by the following details:

- Your availability displayed during the appointment duration: Reserved, Free
- Your appointment confirmation status: Accepted, Tentative, Declined
- Visibility of the appointment in shared calendars for users who are no participants: Standard, Private, Secret
- If there is enough space, icons for the following appointments are displayed in the Day, Workweek and Week calendar view: serial appointment, appointment with participants, private appointment, secret appointment, tentative appointment

The display is distinguished by the colors, icons and different shadings.

Display of appointments that are visible to all

Depending on the displayed availability, public appointments are displayed in the following colors and patterns:

- Free: Selected color with broad diagonal stripes
- Booked: Selected color

If you do not select a color, the color of the calendar is used. Depending on the appointment confirmation status, public appointments are displayed as follows:

- Accepted appointments are displayed in the color and pattern of the availability.
- Tentatively accepted appointments are displayed with question marks.
- Declined appointments are displayed in light gray with crossed subject.
Tip: In the calendar settings, you can define whether declined appointments are displayed.

Note: In public or shared calendars you will only see the colors of appointments that have been created by you.

Private or secret appointments display

Private and secret appointments are displayed as follows:

- Private appointments are displayed in gray and are marked with the **Private** icon  . Users that are no participants can only view the appointment date in shared calendars.
- Secret appointments are displayed in gray and are marked with the **Private** icon  . Users that are no participants can not view the appointment in shared calendars. Secret appointments are not considered for the conflict handling. Secret appointments are not displayed in the scheduling view.

9.8 Accessing Files with WebDAV

With WebDAV you can access the Drive app files in the same way as when accessing local files on your disk. Compared with the access from the Groupware GUI, WebDAV has advantages and disadvantages:

- The advantage is the quick and direct access with a file browser e.g. the Windows Explorer. You need not be logged in to the Groupware GUI.
- The disadvantage is that you can only see the current document version. Neither the version history nor additional information, like comments, are displayed.

Warning: If you delete a file with WebDAV, all versions will be lost, not only the current version.

Note: To create objects with WebDAV in a public or shared folder, you need to have at least the following permissions for the respective folder: create objects, edit own objects. To also read own objects, you additionally need this permission: read own objects. Information on permissions can be found in [10.2.9: Which permissions can be used? \(page 245\)](#).

Prior to accessing the Drive app files with a file browser, e.g. the Windows Explorer, you have to set up the WebDAV access. Depending on the system software the procedure differs:

- [Setting up WebDAV under Linux \(p. 223\)](#)
- [Setting up WebDAV under Windows 7 \(p. 223\)](#)

9.8.1 Setting up WebDAV under Linux

How to set up WebDAV access under Linux:

1. Open the KDE Konqueror or a similar browser.
2. Enter the following address in the address bar:
webdav://<address>/servlet/webdav.infostore
Replace the <address> with the Groupware Server's ip address or url.
3. Enter your username and password for accessing the Groupware Server.

Result: The Drive app files are displayed in the browser.

9.8.2 Setting up WebDAV under Windows 7

How to set up WebDAV access under Windows 7:

Prerequisite: The registry key *BasicAuthLevel* has to be set to *2* in the Windows registry database. Further information can be found in the Microsoft articles <http://support.microsoft.com/kb/928692> and <https://support.microsoft.com/kb/841215>.

Note: Depending on the Windows 7 setup, there can be delays when accessing WebDAV folders. If this is the case, follow the instructions in this article: <http://support.microsoft.com/kb/2445570>.

1. In the navigation area of the Windows Explorer select the entry **Computer**.
2. In the icon bar click on **Connect drive**. The *Connect drive* window opens.
3. Click on **Connect to a Web site that you can use to store your documents**. The *Add network address* window opens. Click on **Next**.
4. Select **Select custom network address**. Click on **Next**.
5. In the *Add network path* dialog window enter the following address:
https://<address>/servlet/webdav.infostore
where <address> needs to be replaced by the Groupware server's ip address or url.
Click on **Next**.
6. Enter your username and password for accessing the Groupware Server. Click on **OK**.
7. On the next page you can assign a name to the network address. Click on **Next**.
8. Click on **Finish**.

Result: Below **Computer** you can access your Drive app files.

9.9 Adding storage accounts

If you use third party cloud storages like Google Drive, Dropbox, Box or OneDrive, you can access the data of those accounts from within the groupware by adding those accounts as storage accounts.

How to add a storage account:

1. In the folder view, click on **Add storage account**. The *Add storage account* window opens.
2. Click an icon. The further procedure depends on the cloud storage account provider:
 - If the provider asks for credentials, enter your credentials for the cloud storage account.
 - If the provider asks you for the permission to access the data, grant this permission.

A folder for the storage account appears in the folder view.

Options:

- To rename the folder, click the **Actions** icon  next to the folder name or use the context menu.
- Depending on the folder content, you can use the toolbar functions, e.g. to view pictures or to copy files.

Note: Depending on the storage account's functionality, working with versions might not be supported.

9.10 DriveSettings

How to use the Drive settings:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Click on **Drive** in the sidebar.

Depending on the configuration, the following settings are available:

Adding files with identical names

Defines whether a new file or a new version of a possibly existing file with the same name should be created.

- **Add new version**
A new version of the file will be created.
- **Add new version and show notification**
A new version of the file will be created. As soon as the process is finished, you will receive a notification.
- **Add separate file**
A new file will be added. The file name is enhanced with a consecutive number.

Slideshow / Autoplay mode for images

Defines how to present pictures that are displayed in the viewer

Advanced settings

- **Show hidden files and folders**
Defines whether hidden files and folders are displayed. The names of hidden files and folders are preceded by a dot. The local Drive apps require such files and folders for internal purposes. In order to not endanger the functionality of the local Drive apps, such hidden files and folders must not be changed or deleted.

Version history

Depending on the configuration, you can define the number of file versions that should be kept for a specific timeframe set by you. If the maximum timeframe or number is reached, older versions are deleted upon creation of a new version.

- **Timeframe**
Defines the period after which an older version is deleted when creating a new version.
- **File version limit**
Defines the maximum number of versions. If the maximum is reached, an older version is deleted when creating a new version.

10.1 Managing Data with Folders

Folders help you to:

- keep an overview of your objects
- share information with other users and external partners
- search for certain information and quickly find the information again

10.1.1 What are folder types?

The folder type defines the folder access for the users. The following folder types exist in the folder view:

- Personal folders
 - Personal folders contain your E-Mails, contacts, appointments, tasks, and files. Other users can not view your personal folders, unless you share them with other users.
 - Your personal folders for contacts, appointments, tasks, and files can be found below *My address books*, *My calenders*, *My tasks*, *My files* in the respective app.
- Public folders
 - Public folders contain contacts, appointments, and documents that are of common interest to all users. Each user can create public folders and share them with other users.
 - The public folders for contacts, appointments, tasks, and files can be found below *Public address books*, *Public calenders*, *Public tasks*, *Public files* in the respective app.
- Shared folders
 - Shared folders have been shared with you by other users with read or write access.
 - The shared folders for contacts, appointments, tasks, and files can be found below *Shared address books*, *Shared calenders*, *Shared tasks*, *Shared files* in the respective app.

Note: If there are no public or shared folders, their folder type headers are not displayed.

Related topics:

[What is the purpose of permissions? \(p. 230\)](#)

10.1.2 What is the purpose of permissions?

Permissions define what an internal user or external partner is allowed to do with a particular folder and its contents.

- As internal user you have preset permissions for existing folders.
When creating a new folder, you will be granted the preset permissions.
- When inviting other persons to a shared item, you grant them particular permissions.

You have the following permissions for folders that already exist:

- You are the owner of your personal folders.
The owner has the same permissions as an administrator. The owner has all permissions for this folder. The owner can grant other users permissions to the folder.
- You are allowed to create folders and objects in public folders.
- You are allowed to view folders and read objects in the *Global Address book*.

Depending on where you create a new folder, particular rights are assigned to you.

- If you create a new folder in a personal folder:
 - You are the owner.
 - In the E-Mail app and the Drive app, other users inherit their permissions for the parent folder. In the other apps, other users do not inherit permissions.
- If you create a new folder in the **Public files** folder:
 - You are the owner.
 - Other users will get no rights. You have to set the permissions for the new folder. If you then create new subfolders in this folder, the permissions for this folder are inherited by the new subfolders.
- If you create a new folder in the shared folder of another user:
 - The user who shared the folder is the administrator of the new folder.
 - You are the author of the new folder.
An author is allowed to change or delete existing objects, to create and edit new objects, and to create subfolders.
 - Other users will get the same rights as for the parent folder.

Note: You need to have the permission to create objects in the shared folder.

10.1.3 Navigating within the folder structure

The following functions are available:

- open or close the folder view
- change the folder view width
- open or select a folder in the folder view or by using the navigation path

How to open or close the folder view:

Use one of the following methods:

- Click on **View** in the toolbar. Enable or disable **Folder view**.
- Below the folder view, click the **Open folder view** icon » or the **Close folder view** icon «.

How to change the folder view width:

1. Move the cursor to the right border of the folder view. A double arrow will be displayed.
2. Drag the border to the left or to the right.

How to open or select a folder:

1. If the folder view is closed, open it.
2. To view a folder's subfolders, click on the arrow next to the folder name.
3. Click on a folder. The folder's items are displayed in the detail view.
In the Drive app, you additionally have the following options:
 - Click on an entry in the navigation bar to open a parent folder.
 - To open a folder, double-click on it in the detail view.

Further actions that include this function:

10.1.4 Hiding folders

In the Address Book, Calendar or Tasks apps, you can hide certain personal, shared or public folders. The following functions are available:

- hide single folders
- display hidden folders again

Each hidden folder is displayed in a collective folder at the bottom of the folder view.

How to hide a folder:

1. In the Address Book, Calendar or Tasks app, select the folder you want to hide, in the folder view.
2. Click the **Actions** icon  next to the folder name. Click on **Hide**.

Note: If you select a folder that can not be hidden, this function is not displayed.

How to display a hidden folder again:

1. In the Address Book, Calendar or Tasks app, respectively select one of the entries **Hidden address books**, **Hidden calendars** or **Hidden tasks**. The hidden folders will be displayed.
2. Click the **Actions** icon  next to a folder name. Click on **Show**.

10.1.5 Adding folders to favorites

You can add frequently used folders to the symbolic folder *Favorites*. The following functions are available:

- add folders to favorites
- remove folders from favorites

The original position of the objects in the folder view will not be affected by those actions.

How to add a folder to *Favorites*:

1. Select a folder in the folder view.
2. Click the **Actions** icon  next to the folder name. Click on **Add to favorites**.

Result: The folder is displayed in the upper part of the folder view below *Favorites*. If *Favorites* does not exist already, it will be created automatically.

How to remove a folder from *Favorites*:

1. Select a folder in the folder view below *Favorites*.
2. Click the **Actions** icon  next to the folder name. Click on **Remove from favorites**.
You can also activate this function by right-clicking on the folder in its original position in the folder view.

Result: The folder is removed from *Favorites*. If *Favorites* is empty, the folder will be removed.

10.2 Sharing Data

You can co-operate with internal users or external partners by sharing the following data with read or edit permissions:

- E-Mail folders, address books, calendars, task folders
- Drive-folders, files

When sharing items, particular permissions are granted to the persons you share the items with.

What you should know:

- In order to share data, you need to have administrator permissions for the respective folder.
- The global address book can not be shared.
- E-Mails can only be shared with internal users, not with external partners.
- Address books, calendars, and tasks can only be shared with external partners with read access, not with edit access.
- If you share a folder in the Drive app, you can define whether subfolders should be shared as well.

The following options exist:

- [Sharing with public links \(p. 236\)](#)
You can give this link to other persons. The data are shared with read permissions. Other permissions can not be granted.
- [Inviting to a shared item \(p. 238\)](#)

10.2.1 Sharing with public links

You can share data with read access by creating a public link. You can give this link to other persons. Everyone who gets this link can view the data.

The following options exist:

- You can share the following data with read access by using a public link: address books, calendars, tasks, folders, files.
E-Mails can not be shared with a public link.
- You can set a password for the access. You can define that the link expires after a specific time frame, e.g. after one month.
- You can revoke the public link.

How to share data with read access by using a public link:

1. Select the app that should be used for sharing data.
Select a folder in the folder view.
Note: Select a folder for which you have the permission to share. Depending on the app, some folders can not be shared.
In the Drive, you can also select a folder or file in the display area.
2. Click the **Actions** icon  next to the folder name. Click on **Create sharing link**.
In the Drive app, you can also use one of the following methods:
 - Click the **Share** icon  in the toolbar. Click on **Invite people**.
 - Select **Invite people** from the context menu.A window opens. It contains a public link for a read access to the share.
3. To share the link, you have the following options:
 - To insert the link into other applications, click the **Copy to clipboard** icon  next to the link.
 - In order to directly send the link per E-Mail, enter the respective E-Mail addresses. Tips:
 - While entering the E-Mail address, several matching suggestions are displayed. To accept a suggestion, click on it.
 - To select contacts from a list, click the **Address book** icon  on the right side of the input field.You can enter a message for the recipients.
 - Per default, the data are shared with read access for an unlimited time. To set a time limit for the access to the shared data, enable **Expires in**. Select a time range.
 - To protect the access with a password, enable **Password required**. Enter a password. If you send the public link per E-Mail, the E-Mail contains the password.
4. If you share a folder in the Drive app, you can transfer the folder's permissions to all existing or newly created subfolders of this folder. To do so, enable **Apply to all subfolders**.
5. Click on **Close**.

10.2.2 Inviting to a shared item

In order to share data with specific persons with read or edit access, you can invite internal users or external partners to a shared item. The users will receive an E-Mail invitation. If an external partner accesses the share, the partner will automatically be logged in as guest user.

The following options exist:

- You can share E-Mails with internal users with read access.
- You can share address books, calendars and tasks with internal users with read or edit access, with external partners only with read access.
- You can share folders and files with internal users and external partners with read or edit access.

When sharing items, internal users or external partners are granted certain permissions for the shared data.

Note the following:

- You can not share your personal *Inbox* folder. In order to grant other users access to your E-Mail messages, share an E-Mail folder that is located below your *Inbox* folder. Other users have to subscribe to this E-Mail folder then.
- You have the exclusive administrator rights for your personal address book, calendar and task folders. You can not grant administrator rights for these folders to other users.

How to invite internal users or external partners to a share:

1. Select the app that should be used for sharing data.
Select a folder in the folder view.
Note: Select a folder for which you have the permission to share. Depending on the app, some folders can not be shared.
In the Drive, you can also select a folder or file in the display area.
2. Click the **Actions** icon  next to the folder name. Click on **Permissions / Invite people**.
In the Drive app, you can also use one of the following methods:
 - Click the **Share** icon  in the toolbar. Click on **Create sharing link**.
 - Select **Create sharing link** from the context menu.The window for adjusting the permissions opens.
3. Enter a name or an E-Mail address in *Add people*. Tips:
 - While entering the recipients, matching suggestions are displayed. To accept a suggestion, click on it.
 - To select contacts from a list, click the **Address book** icon  on the right side of the input field.The selection will be added to the list as internal user, group or guest. Preset permissions are granted.
If required, enter a message.
4. To edit the permissions, you have the following options:
 - To adjust a user role, click on the entry in **Current role**. Select an entry from the menu.
 - To adjust the permission details, click on the entry in **Detailed access rights**. Select a permission from the menu.
 - In order to remove a permission, click the **Action** icon  next to the name. Click on **Revoke access**.
5. If no E-Mail notifications about the shared item are to be sent, disable **Send notifications**.
Note: The checkbox can not be enabled when inviting external partners to a shared item.
6. If you share a folder in the Drive app, you can transfer the folder's permissions to all existing or newly created subfolders of this folder. To do so, enable **Apply to all subfolders**.

10.2.6 Viewing or editing shares in the Drive app

In addition to the basic functions, there are the following options in the Drive app:

- You can display your shared objects as a list. You can sort the list by different criteria.
- You can edit or revoke shares.

How to view your shares in the Drive app:

1. In the Drive app, open **My shares** in the folder view.

The folders and files shared by you are displayed in the detail view. For each share a row with the following details is displayed in the detail view:

- An icon indicates the share's object type: file or folder.
 - The share's name and folder path. To open a folder, click on a path entry.
 - Three icons in different colors indicate whether an object has been shared with specific users:
 - The icon  indicates whether the object has been shared for internal users.
 - The icon  indicates whether the object has been shared for guest users.
 - The icon  indicates whether the object has been shared by using a public link.
 - The share's creation date.
2. You can do the following:
 - To sort the shares list, click on **Sort by** above the list.
 - To display the folder of a shared object, open the object's context menu. Select **Show in Drive**.
 - To display the content of a share's parent folder, click on a path entry in the list.

How to edit a share in the Drive app:

1. In the Drive app, open **My shares** in the folder view.

The folders and files shared by you are displayed in the detail view.

2. Select a folder or file in the detail view. You have the following options:
 - To edit the share, click on **Edit share** in the toolbar or context menu.
Depending on the type of share, the window for editing the public link or the window for changing the permissions opens. Change the settings.
 - To revoke the share, click on **Revoke access** in the toolbar or context menu.

10.2.7 Subscribing to E-Mail folders

In order to see E-Mail folders shared by other users, you have to subscribe to those folders.

How to subscribe to shared E-Mail folders:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Click on **E-Mail** in the sidebar.
3. Click on **Change IMAP subscription** in the display area.
4. In the *Subscribe IMAP folders* window activate the checkboxes of the folders that you want to subscribe to. Click on **Save**.

10.2.8 Accessing other users' shares

In the folder view, you have access to data shared with you by other users.

How to access data shared by other users:

1. Open the shared folder in the folder view. Depending on the app, you can find these folders below *Shared address books*, *Shared calendars*, *Shared tasks*, *Shared files*.
If a user shared data with you, a folder named after the user will be displayed.
Tip: To see the permissions that have been granted for the shared folder, click the **Actions** icon . Click on **Permissions / Invite people**.
2. Open the folder to display its contents.
3. Select one or several objects. Use the function bar entries.
Note: Depending on whether the objects are shared with read or edit rights, different functions can be available.

10.2.9 Which permissions can be used?

In order to easily grant logical permission combinations, there are specific preset user roles: A user role consists of logical permission combinations. You can also grant detailed permissions. You can grant such permissions by sharing objects.

Administrator

A folder's administrator owns all permissions for this folder. The owner can grant other users permissions to the folder.

- Folder permissions: create objects and subfolders, rename folders
- Object permissions: read all objects, edit all objects, delete all objects

Viewer

A viewer can read all existing objects. A viewer has not other permissions.

- Folder permissions: view the folder
- Object permissions: read all objects

Reviewer

A reviewer can read and edit existing objects. The reviewer can not create new objects though. The reviewer can not delete objects.

- Folder permissions: view the folder
- Object permissions: read all objects, edit all objects

Author

An author is allowed to change or delete existing objects, to create and edit new objects, and to create subfolders.

- Folder permissions: create objects and subfolders
- Object permissions: read all objects, edit all objects, delete all objects

Detailed permissions

The preset permissions for the user roles can be refined. The following permissions can be granted:

- Folder
 - view the folder
 - create objects
 - create objects and subfolders
- read permissions
 - none
 - read own objects
 - read all objects
- write permissions
 - none
 - edit own objects
 - edit all objects
- delete permissions
 - none
 - delete own objects
 - delete all objects

10.2.10 Use cases for permissions

The following examples show which permissions need to be granted to other users or external partners to enable them to execute specific actions in a shared folder. You can grant such permissions by sharing objects.

- **Example 1:** View objects. Not change and delete objects. Not create new objects.
Settings in *Details*:
 - *Folders*: view the folder
 - *Read permissions*: read all objects
 - *Write permissions*: none
 - *Delete permissions*: none
 - *Administrative role*: UserYou can also assign the **Viewer** role.
- **Example 2:** View objects. Not change and delete objects. Create and edit new objects.
Settings in *Details*:
 - *Folders*: view the folder
 - *Read permissions*: read all objects
 - *Write permissions*: edit own objects
 - *Delete permissions*: delete own objects
 - *Administrative role*: User
- **Example 3:** Not view existing objects. Create and edit new objects.
Settings in *Details*:
 - *Folders*: create objects
 - *Read permissions*: read own objects
 - *Write permissions*: edit own objects
 - *Delete permissions*: delete own objects
 - *Administrative role*: User
- **Example 4:** View and edit all objects. Create and edit subfolders and objects,
Settings in *Details*:
 - *Folders*: create objects and subfolders
 - *Read permissions*: read all objects
 - *Write permissions*: edit all objects
 - *Delete permissions*: delete all objects
 - *Administrative role*: UserYou can also assign the **Author** role.
- **Example 5:** All permissions. Grant permissions to other users.
Settings in *Details*:
 - *Folders*: create objects and subfolders
 - *Read permissions*: read all objects
 - *Write permissions*: edit all objects
 - *Delete permissions*: delete all objects
 - *Administrative role*: AdministratorYou can also assign the **Administrator** role.

10.3 Managing Accounts

Learn how to manage your [accounts](#) that have been set up by default or have been set up by you.

- your primary E-Mail account
- messages from social networks, e.g. Twitter
- appointments from your Google calendar or from calendars that are publicly available on the Internet.
- storage accounts, e.g. Google Drive
- your Google contacts or contacts from other sources

The following options exist:

- [Editing the primary E-Mail account \(p. 250\)](#)
- [Viewing, editing, deleting accounts \(p. 251\)](#)

10.3.1 Editing the primary E-Mail account

The following options exist:

- You can change the name of your primary E-Mail account. This name is displayed in the E-Mail settings.
- Change the preset sender name.
- You can change the folders of your primary E-Mail account by assigning other folders to a standard folder.

How to edit the primary E-Mail account:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Accounts**.
3. Click on **Edit** next to *E-Mail* in the display area. The *Edit mail account* window displays the current settings.
4. To change the account name, click into the input field next to **Account name**.
Note: The entries for *Incoming server* and *Outgoing server* can not be changed.
5. To change the preset sender name, click into the input field next to **Your name**.
You can overwrite this preset name when composing an E-Mail.
6. To select other folders, browse down to *Standard folders*.
Click on **Select** next to a folder. Select another folder.
7. Click on **Save** at the bottom of the window.

10.3.2 Viewing, editing, deleting accounts

Depending on the account type, you can edit different account settings:

- For E-Mail accounts: account name, sender name, Unified Mail usage, server parameters, folder names
- for social networks: account name

How to view, edit or delete accounts:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Accounts**.
3. Click on **Edit** next to an account in the display area. The settings are displayed in an editing window. If you use several services from the selected provider, e.g. Google, the editing window shows an overview of the services.
4. Change the settings.
Notes for editing external E-Mail accounts:
 - To change the preset sender name, click into the input field next to **Your name**.
 - You can overwrite this preset name when composing an E-Mail.

Further options in the editing window:

- Depending on the account type, you can open the respective folder in the corresponding app by clicking on the name of the service.
- If you no longer want to access an account from within the groupware, you can delete this account. To do so, click the **Delete** icon  next to an account.

10.4 Managing Subscriptions

Learn how to manage the address books you subscribed to:

- Google contacts
- contacts from other sources

The following options exist:

- [refresh subscribed data \(p. 253\)](#)
You can transfer changes that have been applied to subscribed data to the groupware by refreshing the subscribed data.
- [Managing subscribed address books \(p. 253\)](#)
In order to keep the overview of your subscribed data, you can manage them on an overview page.

10.4.1 refresh subscribed data

The following changes are applied when refreshing subscribed data:

- new contacts
- edited contacts

How to refresh subscribed data:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Subscriptions**.
3. Click on **refresh** next to a subscription in the display area.

10.4.2 Managing subscribed address books

The following options exist:

- show all subscriptions
- disable or enable a subscription
- remove a subscription

How to display all subscriptions:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Subscriptions**.
3. To show the folder with the subscribed data, click on the navigation path below the subscription's name.

Tip: You can only view information for a specific folder. To do so, click the **Subscriptions** icon  next to a folder with subscriptions, in the folder tree.

How to disable or enable a subscription:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Subscriptions**.
3. Click on **Disable** or **Enable** in the display area next to a subscription.

How to remove a subscription:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Subscriptions**.
3. Click the **Delete** icon  next to a subscription in the display area.

11 Data Security

Learn how to increase the data security when working with the groupware.

- Protect your data against unauthorized access.
- Minimize the threat of malware.
- Prevent the reception of unwanted messages.

The following options exist:

- [Automatic sign out \(p. 256\)](#)
You can define whether you are automatically signed out.
- [Externally linked images in E-Mails \(p. 257\)](#)
You can define whether externally linked images in E-Mails are automatically loaded and displayed.
- [Using a whitelist \(p. 258\)](#)
You can enter trusted E-Mail sources in a whitelist.
Note: Depending on the configuration, this function might not be available.
- [Displaying or terminating sessions \(p. 259\)](#)
You can display active sessions and terminate them if required.
- [Multi-Factor Authentication \(p. 260\)](#)
You can set up a 2-step verification for the login.

In addition, you can encrypt your E-Mails and files. Information on encryption can be found in [Encrypting Data with Guard \(p. 267\)](#)

11.1 Automatic sign out

You can define whether you are automatically signed out if you have not worked with the groupware for a specific time.

How to define whether you are automatically signed out:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Security**.
3. Select an entry from the **Automatic sign out** drop-down in the display area.

Similar actions:

[Using a whitelist \(p. 258\)](#)

[Displaying or terminating sessions \(p. 259\)](#)

11.2 Externally linked images in E-Mails

Externally linked images are not part of the E-Mail itself. They are loaded from an external source upon reading the E-Mail. You can define whether those images are loaded and displayed. If you allow loading externally linked images, your privacy and computer are endangered by the following security issues:

- The sender can gather information, e.g. whether your E-Mail address is valid or when you retrieved the E-Mail. Such information can e.g. be used to purposefully send spam E-Mails.
- The externally linked graphic can be used to infect your computer with malware.

How to define the loading of externally linked images:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Security**.
3. You can enable or disable the **Allow pre-loading of externally linked images** option in the display area.
 - If externally linked images are not to be displayed, disable the setting.
 - If externally linked images are to be loaded and displayed, enable the setting.

Similar actions:

[Using a whitelist \(p. 258\)](#)

[Displaying or terminating sessions \(p. 259\)](#)

Related topics:

[Displaying E-Mails \(p. 63\)](#)

11.3 Using a whitelist

Depending on the configuration, you can create a [whitelist](#). All E-Mails from senders who are recorded in the whitelist, are treated as follows:

- The E-Mail is not treated as unwanted E-Mail.
- The E-Mail source is labeled as trustworthy.
- Externally linked images are immediately loaded and displayed.

Warning: When making entries into the whitelist, several security measures are circumvented. Only enter E-Mails or [domain names](#) in the whitelist if you absolutely trust them.

How to create a whitelist:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. In the sidebar, click on **Security**.
3. Enter the respective E-Mail addresses or domain names as comma separated list in the input field below *Always trust mails from the following senders* in the display area. Please also note:
 - When entering multiple E-Mail addresses or domain names, separate the entries with a comma.
 - Make sure to enter the exact E-Mail addresses or domain names.

11.4 Displaying or terminating sessions

You can be logged in to your groupware account with different devices on various clients simultaneously, e.g. with desktop browsers, E-Mail clients, tablets, smartphones. With each login, an active [session](#) is created on the groupware server. On the following occasions it can make sense to list active sessions and to terminate them if required:

- You want to check whether you are logged in to a certain device or client.
- You want to log out from a certain device.
- You want to prevent reaching the maximum number of allowed sessions as you then could no longer log in to a further device.

The following options exist:

- display all active sessions
- terminate single sessions
- terminate all sessions except the current one

How to edit the active sessions:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Select **Security** in the sidebar. Click on **Active clients**.
All active sessions are listed in the display area.
3. In order to terminate sessions, do one of the following:
 - In order to terminate a single session, click on **Sign out** next to the client.
 - To terminate all sessions except the active one, click on **Sign out from all clients**.

Similar actions:

11.5 Multi-Factor Authentication

Per default, you only log in to the groupware with your username and password. Depending on the configuration, you can increase the security when logging in by using an additional authentication that is executed after the usual login. This procedure is generally called multi-factor authentication.

The additional authentication is done by verifying your identity with a device owned by you. You have the following options to verify your identity:

- **Google Authenticator**
You need to install an app on your mobile device to get an auto-generated code. You need to enter this code to confirm your identity.
- **Yubikey, Google Security Key or compatible FIDO device**
With a security key that is connected with your PC via USB or wirelessly, your identity is verified during the login.
- **send code via SMS**
An SMS with a code is sent to your mobile device. You need to enter this code to confirm your identity.

The following options exist:

- [Setting up verification methods \(p. 261\)](#)
- [Verifying a login by using an authenticator app \(p. 263\)](#)
- [Verifying the login with a security key \(p. 263\)](#)
- [Verifying the login with an SMS code \(p. 264\)](#)
- [Recovering the verification \(p. 265\)](#)
- [Managing verification methods \(p. 266\)](#)

11.5.1 Setting up verification methods

Prior to being able to use a 2-step verification for the next login, you have to set up the additional verification methods wanted. The following options exist:

- Set up verification methods.
- As soon as having set up an initial verification method, you have to set a recovery method. You need the recovery e.g. in case you have lost your device that you use for the verification. In this case, you can log in to the groupware by using the recovery method.

How to set up verification methods:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Select **Security** in the sidebar. Click on **2-step verification**.
3. Click on **Add verification option** in the display area.
The *Add verification option* window opens. Depending on the configuration, various verification methods are offered.
4. Setting up a verification by using an Authenticator App:
 - a. Install a Google Authenticator or compatible app on the mobile device that you want to use for the verification.
Launch the app.
 - b. Click on **Google Authenticator or compatible** in the *Add verification option* window.
 - c. The *Authenticator registration* window displays a QR code. Scan the QR code with the Authenticator app on the mobile device.
 - d. The app on the mobile device displays a code. Enter this code in the *Authenticator registration* window. Click on **OK**.When having set up the initial verification method, the *Add recovery option* window is displayed. In the following instruction, you will learn how to [add a recovery method](#).
5. Set up a verification with a security key:
Note: Depending on the browser, this verification method might not be supported.
 - a. Connect your security key with your workstation. Depending on the security key, a USB or wireless connection is used.
 - b. Click on **Yubikey, Google Security Keys or compatible FIDO device** in the *Add verification option* window.
 - c. Activate your security key e.g. by pressing a button on the security key.When having set up the initial verification method, the *Add recovery option* window is displayed. In the following instruction, you will learn how to [add a recovery method](#).
6. Setting up a verification via text message:
 - a. Click on **Code via text message** in the *Add verification option* window.
 - b. The *Add User ID* window opens. Enter your mobile phone number.
 - c. Shortly after, you will receive a text message with a code. Enter this code in the *Confirm Code* window. Click on **OK**.After having set up the initial verification method, the *Add recovery option* window opens. In the following instruction, you will learn how to [add a recovery method](#).

How to add a recovery method in the *Add recovery option* window:**1.** Setting up a recovery via text message:

Note: When having selected the verification via text message as initial verification method, you have to enter another mobile device for a recovery via text message.

- a.** Click on **Code via text message**.
- b.** The *Add Multifactor Device* window opens. Enter the phone number of the mobile device that you want to use for a recovery.
- c.** Shortly after, you will receive a text message with a code. Enter this code in the *Confirm Code* window. Click on **OK**.

2. Setting up a recovery via recovery code:

- a.** Click on **Backup code to access your account**.
- b.** The **Recovery Code** window opens. It displays a code that can be used for the recovery.
- c.** In order to print the recovery code, click on **Print**.
In order to save the recovery code as text file, click on **Download**. In case of a recovery, you can import the recovery code from this text file.

11.5.2 Verifying a login by using an authenticator app

This verification method works as follows:

- Use a code that is created by an app on your mobile device.
- The code is valid for 30 seconds. As soon as the time expires, a new code is automatically displayed which again is valid for 30 seconds.
- When logging in, you have to use the same authenticator app that you used for setting up the verification method.

How to verify your identity with an authenticator app:

1. Launch the authenticator app on your mobile device.
If the app displays multiple services, select the service that you use for verifying the groupware login.
2. Log in to the groupware with your username and password.
3. If having set up multiple verification methods, the *Select 2-step verification method* window opens. Select **Google Authenticator**.
The *2-Step Verification* window opens. In **Authentication Code**, enter the code that is currently displayed by the app on your mobile device.

- Use a security key that you connect with your work station via USB or wirelessly.
- While authenticating, you are prompted to activate the security key e.g. by pressing a button on the security key.

Note: Depending on the browser, this verification method might not be supported.

How to verify your identity with a security key:

1. Connect your workstation with the security key.
2. Log in to the groupware with your username and password.
3. If having set up multiple verification methods, the *Select 2-step verification method* window opens. Select **Yubikey, Google Security Keys or compatible FIDO device**.

- Use a code that you receive per SMS on your mobile device.
- The last digits of the mobile phone number of the device to which the SMS is sent to, are displayed.

How to verify your identity with an SMS code:

1. Log in to the groupware with your username and password.
2. If having set up multiple verification methods, the *Select 2-step verification method* window opens. Select **SMS Code**.
An SMS with a code is sent to your mobile device.

11.5.5 Recovering the verification

You need the recovery e.g. in case you have lost your device that you use for the verification. In this case, you can log in to the groupware by using the recovery method.

How to log in using a recovery method:

1. Recovering with a recovery code:
 - a. Click on **I lost my device** in the *2-Step Verification* or *Select 2-Step Verification Method* window. In a window, you are asked to enter the recovery code.
 - b. Enter the recovery code.
If you downloaded the recovery code as text file when having set up the recovery method, you can also click on **Upload recovery file**. Select the text file with the recovery code.
 - c. Shortly after, you will receive an SMS with a 4-digit authentication code. Enter this code. Click on **OK**.
2. Recovering via an SMS code:
 - a. Click on **I lost my device** in the *2-Step Verification* or *Select 2-Step Verification Method* window. In a window, you are asked to enter the recovery code.

- add a verification method
- change a verification device's name
- remove a verification device

You can set up and manage multiple verification methods but only one recovery method.

How to manage verification methods or verification devices:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Select **Security** in the sidebar. Click on **2-step verification**.
3. The following options exist:
 - **Edit**. Opens the **Edit multifactor device** window to change the name of the device.
 - **Delete** icon. Removes a verification device.
 - **Add verification option**. Adds a new verification method.

12 Encrypting Data with Guard

Guard is a groupware security component that allows to encrypt E-Mails and files.

- Encrypt your E-Mail communication with other users or external partners.
- Encrypt your files. Share the encrypted data with other users.
- Use the security options to define the encryption level.
- The encrypted data are password-protected. Depending on the configuration, you can reset your password if forgotten.

Learn how to work with Guard.

- [GuardSettings \(p. 279\)](#)

Information on further security-related topics can be found in [Data Security \(p. 255\)](#).

12.1 Setting up Guard

Prior to be able to use Guard, you have to apply some basic settings:

- You have to enter a Guard security password that is used to encrypt data and to access encrypted data.
- Enter a secondary E-Mail address that is used if you forget your Guard security password. In this case, use the function for resetting the Guard security password. A new password will then be sent to you. For security reasons, it is highly recommended to enter a secondary E-Mail address for this purpose. Otherwise the new password is sent to your primary E-Mail account.

There are two options for making the basic settings:

- Define the basic settings while initially using an encryption function.
- Define the basic settings in the groupware settings before using the encryption function.

How to define the basic settings when initially using an encryption function:

1. Enable the encryption function when composing an E-Mail, encrypting a file or uploading a new file by clicking on the **Encrypt** icon .
2. You consecutively will be asked to enter a Guard security password and a secondary E-Mail address. Enter the data.

How to define the basic settings before initially using an encryption:

1. Click the **System menu** icon  on the right side of the menu bar. Click the **Settings** menu item.
2. Select **Security** in the sidebar. Click on **Guard Security**.
When initially opening the Guard security settings, the *Guard Create Security Keys* window opens.
3. In the **Password** field, enter the password that you want to use for encrypting your data.
Confirm the password in the **Verify** field by entering it again.
4. In the **Enter new secondary email** field, enter the E-Mail address that is used for receiving a temporary password for resetting your Guard security password.
5. Click on **OK**.

12.2 Encrypting E-Mail Conversations

The following options exist:

- [Reading encrypted E-Mails \(p. 269\)](#)
- [Sending encrypted E-Mails \(p. 270\)](#)
- [How can external recipients read an encrypted E-Mail? \(p. 271\)](#)

12.2.1 Reading encrypted E-Mails

To be able to read an encrypted E-Mail, the Guard security password is required.

How to read an encrypted E-Mail:

1. Select an E-Mail with the *Encrypted* icon . In the detail view, the notification *Secure E-Mail, enter your Guard security password.* is displayed.
Note: If, when having used guard the last time, you set that Guard should remember the security password, the E-Mail will be displayed immediately.
2. Enter the Guard security password.
You can define how long the security password should be remembered by Guard. To do so, enable Keep me logged into **Guard**. Select a time range from the list.
In the Guard security settings, you can [define a default value](#) for the time range.
3. Click on **OK**. The content is shown in plain text.
If the E-Mail includes attachments, functions for using the attachments' decrypted or encrypted versions are displayed.

12.2.2 Sending encrypted E-Mails

The following options exist:

- Sending an encrypted E-Mail. Only you and the recipients can read the E-Mail content.
- Sending an E-Mail with a signature. The signature ensures that the recipient is able to recognize whether the E-Mail content has been changed on the transport.
- Sending an encrypted E-Mail with a signature.

How to send an encrypted E-Mail:

1. Compose an E-Mail in the E-Mail app as usual.

In the *Compose* page, click the **Encrypt** icon  on the upper right side.

You can also click on **Security** below the subject. Depending on the configuration of the Guard security settings, the menu contains different entries:

- If **Show advanced settings** is disabled, click on **Secure**.
- If **Show advanced settings** is disabled, click on **Secure**.

Icons next to the recipients indicate whether the message can be encrypted for this recipient. If hovering over an icon, a description will be displayed.

2. In order to additionally sign the E-Mail, click on **Security**. Enable **Sign**.
3. If **Show advanced settings** is enabled in the Guard security settings, you can use further options. To do so, click on **Security**. You can activate the following options:
 - Per default, encrypted E-Mails are sent in **PGP Mime** format. Some older clients only support PGP Inline. If the recipient uses such a client, enable **PGP Inline**. If you use **PGP Inline**, you can not send E-Mails in html format.
 - To enable The E-Mail recipient to send an encrypted reply, the recipient needs to have your public key. You can send your public key as attachment. To do so, enable **Attach my key**.
4. Click on **Send encrypted**.

When sending to new recipients, a window is displayed that allows to send notes for opening the encrypted E-Mail to the recipients.

12.2.3 How can external recipients read an encrypted E-Mail?

You can also send encrypted E-Mails to external recipients who are no groupware users. When adding an external recipient, Guard checks whether a public key is available for this E-Mail address. Depending on the result, Guard uses different procedures for sending the encrypted E-Mail:

- If there is a public key for the recipient:
 - The message is sent encrypted with this key. The recipient can read the message with his/her private key.
- If there is no public key for the recipient:
 - If the external user already has a guest account, he/she receives an E-Mail with the link to the login page of his/her guest account. When having logged in, he/she can read the encrypted E-Mail on the guest page. He/she can send an encrypted reply from this page.
 - If there is no guest account, a guest account will be created. The external recipient receives an E-Mail with a link to a guest page and an automatically created password. The user logs in to the guest page. Then he/she can create an own password.
Depending on the configuration, the automatically created password and the link to the guest page are sent in separate E-Mails.
Depending on the configuration, the first E-Mail to the external recipient can be protected with a four-digit pin.
 - Depending on the configuration, guest account E-Mails are deleted from the server after a specific number of days.

The external recipient can send an encrypted reply to the encrypted E-Mail. It is not possible to add additional recipients though.

12.3.1 Encrypting files

When encrypting a file, only the last version of this files will be encrypted. All other versions will be deleted.

How to encrypt a file:

Warning: When encrypting a file, all versions of this file will be deleted, except for the current version. If you need to keep an older version, save it before encrypting the file.

1. Select one or several files in the in the display area of the Drive app.
2. Use one of the following methods:
 - Click the **Actions** icon  in the toolbar. Click on **Encrypt** in the menu.
 - Select **Encrypt** from the context menu.

12.3.2 Creating new encrypted files

You can create a new encrypted file by uploading a local file with encryption.

How to create a new encrypted file:

1. In the Drive app, open a folder in the folder view.

Note: Open a folder for which you have the appropriate permissions to create objects.

2. Click on **New** in the toolbar. Click on **Add and encrypt local file**.

3. Select one or several files in the *Upload file* window.

Click on **Open**. The display area shows the current progress status.

In order to cancel the process, click on **File Details** at the bottom right side of the display area. Click on **Cancel** next to a file name in the *Upload progress* window.

Tip: You can also create a new encrypted file by dragging a file from your operating system's desktop to the Drive app window and drop it in the bottom part.

12.3.4 Downloading encrypted files

You can download an encrypted file to locally read or edit it. The file remains encrypted on the server.

How to download an encrypted file:

1. In the Drive app, select an encrypted file in the display area. Click the **View** icon  in the toolbar.
Note: If you click on **Download** in the toolbar or context menu instead, the downloaded file remains encrypted.
2. If the *Enter Guard security password* window opens, enter the Guard security password.
You can define how long the security password should be remembered by Guard. To do so, enable **Remember my password**. Select a value from the list.

12.3.5 Decrypting files

You can remove a file's encryption by decrypting the file.

How to decrypt a file:

1. In the Drive app, select an encrypted file in the display area.
2. Use one of the following methods:
 - Click the **Actions** icon  in the toolbar. Click on **Remove Encryption** in the menu.
 - Select **Remove Encryption** from the context menu.
3. If the *Enter Guard security password* window opens, enter the Guard security password.
You can define how long the Guard security password should be valid. To do so, enable **Remember my password**. Select a value from the list.

- [Saving selected documents in an encrypted format \(p. 276\)](#)
- [Opening an encrypted document \(p. 277\)](#)

Further functions are available in the Drive app:

- [encrypt](#) existing documents
- [decrypt](#) documents

12.4.1 Creating new encrypted documents

When creating a new document, you have the option to create a document that will be saved encrypted..

How to create a new encrypted document:

1. Depending on whether you want to create an encrypted text document, spreadsheet or presentation, launch the Text, Spreadsheet or Presentation app.
2. In the Office menu bar, click on one of the respective buttons **New text document (encrypted)**, **New spreadsheet (encrypted)**, **New presentation (encrypted)**.
3. If the *Enter Guard security password* window opens, enter the Guard security password.
You can define how long the security password should be remembered by Guard. To do so, enable **Remember my password**. Select a value from the list.

You can open an encrypted document to do the following:

- read or edit the document
- download the document in decrypted format
- print the document as pdf in decrypted format

The document remains encrypted on the server.

How to open an encrypted document:

1. Open a document in the Text, Spreadsheet or Presentation app.
2. If the *Enter Guard security password* window opens, enter the Guard security password.
You can define how long the security password should be remembered by Guard. To do so, enable **Remember my password**. Select a value from the list.

12.5 Signing Out from Guard

You can sign out from Guard without closing the groupware. To open an encrypted E-Mail or file after having signed out, you have to re-enter the Guard security password.

Note: This function is only available if you enable **Remember Password** when opening an encrypted E-Mail or file.

How to sign out from Guard:

1. Click the **System menu** icon on the right side of the menu bar.
2. Click on **Sign out Guard** in the menu.

12.6 GuardSettings

How to use the Guard settings:

1. Click the **Settings** icon on the right side of the menu bar. Click the **Settings** menu item.
2. Select **Security** in the sidebar. Click on **Guard**.

The following settings are available:

Defaults

- **Default to send encrypted when composing email**
Defines whether a new E-Mail is encrypted by default.
- **Default adding signature to outgoing mails**
Defines whether a new E-Mail is encrypted per default.
- **Default to using PGP inline for new mails**
Defines whether the PGP encryption is done inline as default. Only use those settings if the E-Mail client of a recipient does not support PGP. With PGP inline, the recipient can decrypt the message nevertheless. If you use this setting, you can not send E-Mails in html format.
- **Remember password default**
Defines the time range default for Guard to remember the password. You can change this default when being asked for your Guard password.

Keys

Usually, the key management functions are not required for sending or receiving encrypted messages. Those functions can be useful though under the following circumstances:

- You want to use your Guard PGP keys in other E-Mail clients, e.g. in local E-Mail clients.
- You have PGP keys from other PGP applications. You want to use those keys in Guard.
- You have an external partner's public key. In order to send encrypted messages to this external partner or verify received signed messages without having to access a key server, you want to import the partner's public key into Guard.
- You want to provide your public key to an external partner in order to allow the external partner to send encrypted messages to you without the need to access a key server.

The following options exist:

- **Download my public key button**
Locally saves your public key.
- **Your keys button**
Opens the *Your Keys* window for managing your [own keys](#).
- **Public keys of recipients button**
Opens the *Your Keys* window for managing [public keys](#).

12.6.1 Password management

The following options exist:

- change the Guard security password
- When having lost your Guard security password, you can request a temporary Guard security password by resetting the Guard security password.
- Defining an E-Mail address for resetting the password.
- To be able to reset your password if needed, your password has to be saved on the server in an encrypted version. If you do not want your password to be saved on the server, you can completely remove the function for resetting the password.

Note: Depending on the configuration, some of those functions might not be available.

How to change the Guard password:

1. Click on **Reset Password** on the **Guard** page. The *Change password* window opens.
2. In the **Enter current Guard security password** field, enter the password that you have used so far for encrypting your data.
In the **Enter new Guard security password** field, enter the password that you want to use for encrypting your data from now on.
Confirm the password in the **Verify new Guard security password** field by entering it again.
3. Click on **Change**.

How to reset the Guard password:

1. Click on **Reset Password** on the **Guard** page. The *Reset password* window opens.
Click on **Reset**.
2. A new password will be sent to your secondary E-Mail address.
If not having entered a secondary E-Mail address, the new password will be sent to your primary E-Mail address.
This new password is now your current Guard security password. You should immediately [change](#) this password.

How to change your secondary E-Mail address for resetting the password:

1. Click on **Set email address for reset** on the **Guard** page. The *Secondary Email Address* window opens.
2. In the **Enter current Guard security password** field, enter the password for encrypting your data.
In the **Enter new secondary email** field, enter the E-Mail address that is used for receiving a temporary password for resetting your Guard security password.
Re-enter the E-Mail address in **Verify email address**.
Click on **Change Email address**.

How to remove the function for resetting the password:

Warning: If you remove the function for resetting the password, you can no longer reset your password. If you forget your password afterwards, there will be no possibility to decrypt your encrypted E-Mails or files.

1. Enable **Show advanced settings** on the **Guard security settings** page.
Click on **Delete password recovery**. The *Delete Recovery* window opens.
2. Click the **Delete** button.

12.6.2 Managing own keys

The following options exist:

- display own keys, display details
Make a key the current one. Others can use this key to encrypt data.
- add new keys
- add user IDs
When adding additional user IDs to a key, you can use the key for multiple E-Mail accounts.
- download keys
- delete keys

How to display your own keys or make a key the current one:

1. Enable the **Show Advanced Settings** checkbox below *Advanced*.

Click on **Your keys** below *Keys*. The *Your Keys* window opens.

- Your existing keys are displayed. Each key consists of a master key and a subkey.
 - Among other things, the master key is used for signing your E-Mails.
 - The subkey is used for encrypting and decrypting E-Mails and files.
 - Depending on the requirement, Guard automatically uses the master key or the subkey.
2. If your key list contains more than one key, you can define the current key. To do so, enable the **Current** checkbox next to the key. From now on, the current key will be used for encryption.
 3. To display details for a key, click the **Details** icon  next to a key. The *Key Details* window opens. To view the key's signatures, click on **Signatures**.

How to add a new key in the *Your Keys* window:

1. Click the **Add** icon  next to a key. The *Adding Keys* window opens.

2. You have the following options:

- To add a private key, click on **Upload Private Key**. Select a file containing a private key. The *Upload Private Keys* window opens.
To upload the new key, enter your Guard security password. Enter a new password for the new key.
- To add a public key, click on **Upload Public Key Only**. Select a file containing a public key.
- To create a new key pair, click on **Create New Keys**. The *Create Guard Security Keys* window opens.
Enter a password for the new key. Confirm the password.
The new key consists of a master key and a corresponding subkey.

The new key will be entered on top of your key list. The new key becomes the current key.

How to add an additional user ID in the *Your Keys* window:

1. Click the **Edit** icon  next to a key. The *Add User ID* window opens.
2. Enter a name for the user ID. Enter the E-Mail address that you want to use for this key.
Enter your password for this key.
Click on **OK**.

How to download a key in the *Your Keys* window:

1. Click the **Download** icon  next to a key.
2. Define whether to download your private key only, your public key only or both keys.
Caution: Your private key will be downloaded in encrypted form. You should not download your private key to a publicly accessible system, though.

How to delete a key in the *Your Keys* window:

Warning: If you delete a private key, you can no longer decrypt objects that have been encrypted with this key. If you are unsure, you should not delete the key but revoke it. A revoked key can no longer be used for encryption. But you can still decrypt objects that have been encrypted with this key.

1. Click the **Delete** icon  next to a key. The *Delete Private Key* window opens.
2. You have the following options:
 - To revoke a private key, click on **Revoke**.
if you revoke a key, it will no longer be used. But you can still decrypt objects that have been encrypted with this key. For this reason, revoking a key is better than deleting it.
Enter the password for the private key. If required, select a reason for revoking the key.
Click on **Revoke**.
 - In order to delete a private key, click on **Delete**.
Warning: If you delete a private key, you can no longer decrypt objects that have been encrypted with this key.
Enter the password for the private key.
Click the **Delete** button.

When deleting a master key, the corresponding subkey will be deleted too.

- upload public keys
- delete an own public key

How to show public keys:

1. Enable the **Show advanced settings** checkbox below *Advanced*.

Click on **Public keys of recipients** below *Keys*. The *Public Keys* window opens.

The public keys shared by you or other users are displayed. If a user's public key is displayed in this list, you can send an encrypted E-Mail to this user and verify signed E-Mails that have been sent to you by this user.

2. To display details for a key, click the **Details** icon  next to a key. The *Public Keys Detail* window opens. You can share public keys by enabling **Share key**. Other users can view and download your shared keys. Public keys are only available for groupware users.

How to upload a recipient's public key in the *Public Keys* window:

Click the **Add** icon  next to a key. Select a file containing a public key.

How to delete a public key in the *Public Keys* window:
