3 Bugs fixed with this Release

This section provides a summary of bugfixes and changes that have been applied subsequently to shipping Release 2.0.0. Some of the announced bugfixes may have already been fixed at the existing code-base via Patch Releases.

46678 Gateway timeouts on unstable connections
When using a unstable network connection during sync, errors about network timeouts were reported to the user. To take such network conditions into consideration, we raised the internal retry interval to recover from network interruptions.

48264 Selective sync disabled
Earlier versions of the client did not support selective folder sync within "My files". This has been introduced and the related dialog makes more sense now since it provides actual functionality.

4 Tests

Open-Xchange has successfully verified all bug fixes that could be reproduced within a lab environment.
     To avoid side effects, the shipped packages have gone through automated regression test on both, a Continuous Integration System and a dedicated server setup for system and integration testing.
     All changes have been checked for potential side-effects and effect on behavior. Unless explicitly stated within this document, we do not expect any side-effects.
